the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to address the needs of children in the 1990s. The United Nations has developed the Convention on the Rights of the Child (1989) and the United Nations Children's Fund (UNICEF) has developed the Innocent Initiative (1990). The Innocent Initiative is a global strategy for the protection and development of children, which is based on the Convention on the Rights of the Child.

The Innocent Initiative is a global strategy for the protection and development of children, which is based on the Convention on the Rights of the Child. The Innocent Initiative is a global strategy for the protection and development of children, which is based on the Convention on the Rights of the Child.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to address the needs of children in the 1990s. The United Nations has developed the Convention on the Rights of the Child (1989) and the United Nations Children's Fund (UNICEF) has developed the Innocent Initiative (1990). The United Nations Children's Fund (UNICEF) has developed the Innocent Initiative (1990).

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of undernourished people in the world by 50% by the year 2015 (WHO 1996).

One of the main causes of malnutrition is the lack of access to adequate food. This is often due to poverty, which prevents people from being able to afford to buy enough food. Another cause is the lack of access to land, which prevents people from being able to grow their own food.

There are many ways in which the nutritional status of the world's population can be improved. One way is to increase the production of food. This can be done by increasing the area of land that is used for agriculture, by increasing the productivity of the land, and by increasing the number of people who are involved in agriculture.

Another way to improve the nutritional status of the world's population is to increase the access to food. This can be done by improving the distribution of food, by reducing the loss of food, and by increasing the number of people who are able to afford to buy food.

There are many other ways in which the nutritional status of the world's population can be improved. These include increasing the education of people, improving the health care system, and increasing the income of people.

It is important to note that improving the nutritional status of the world's population is not just a matter of increasing the production of food. It is also a matter of increasing the access to food, and of increasing the income of people.

There are many ways in which the nutritional status of the world's population can be improved. These include increasing the production of food, increasing the access to food, and increasing the income of people.

It is important to note that improving the nutritional status of the world's population is not just a matter of increasing the production of food. It is also a matter of increasing the access to food, and of increasing the income of people.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of undernourished people in the world by 50% by the year 2015 (WHO 1996).

One of the main causes of malnutrition is poverty. People who are poor are often unable to afford the food and other resources that they need to live a healthy life. They may also live in areas where the soil is poor and the climate is harsh, which makes it difficult to grow food.

Another cause of malnutrition is lack of access to health care. People who are poor may not be able to afford the medical services that they need to stay healthy. They may also live in areas where there is a lack of clean water and sanitation, which can lead to disease.

There are many ways to improve the nutritional status of the world's population. One way is to increase the production of food. This can be done by using better farming techniques and by increasing the area of land that is used for farming.

Another way to improve the nutritional status of the world's population is to improve the distribution of food. This can be done by building roads and bridges that connect rural areas to cities, and by improving the infrastructure of the food supply chain.

There are also many ways to improve the nutritional status of the world's population through education and health care. People can be taught how to grow food and how to use it in a healthy way. They can also be taught how to take care of their health and how to avoid disease.

Improving the nutritional status of the world's population is a complex task that requires the cooperation of many different groups. It is a task that requires a long-term commitment and a lot of resources.

However, it is a task that is worth doing. A healthy population is a happy population, and a healthy population is a productive population. It is a population that can help to build a better world for all of us.

There are many ways to improve the nutritional status of the world's population. It is a task that requires a long-term commitment and a lot of resources. However, it is a task that is worth doing.

However, it is a task that is worth doing. A healthy population is a happy population, and a healthy population is a productive population. It is a population that can help to build a better world for all of us.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of undernourished people in the world by 50% by the year 2015 (WHO 1996).

One of the main reasons for the increase in undernourishment is the rapid population growth in the developing world. The population of the world is expected to reach 8 billion by the year 2025 (UN 1996).

Another major factor is the increasing demand for food. The demand for food is expected to increase by 50% by the year 2025 (UN 1996).

The increasing demand for food is putting pressure on the world's food resources. The world's food resources are being depleted at an alarming rate (UN 1996).

The depletion of food resources is leading to a decline in the quality of food. The quality of food is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the quality of food is leading to a decline in the nutritional status of the world's population. The nutritional status of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the nutritional status of the world's population is leading to a decline in the health of the world's population. The health of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the health of the world's population is leading to a decline in the productivity of the world's population. The productivity of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the productivity of the world's population is leading to a decline in the standard of living of the world's population. The standard of living of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the standard of living of the world's population is leading to a decline in the quality of life of the world's population. The quality of life of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the quality of life of the world's population is leading to a decline in the happiness of the world's population. The happiness of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the happiness of the world's population is leading to a decline in the peace of the world's population. The peace of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the peace of the world's population is leading to a decline in the stability of the world's population. The stability of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the stability of the world's population is leading to a decline in the security of the world's population. The security of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the security of the world's population is leading to a decline in the freedom of the world's population. The freedom of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the freedom of the world's population is leading to a decline in the justice of the world's population. The justice of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the justice of the world's population is leading to a decline in the equality of the world's population. The equality of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).

The decline in the equality of the world's population is leading to a decline in the harmony of the world's population. The harmony of the world's population is declining because of the increasing use of chemical fertilizers and pesticides (UN 1996).
