the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil union, with 1.5 million people in a civil union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social housing and public transport. The public sector is a major employer in the UK, and it is also a major source of revenue for the state.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.1 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of people who are undernourished by 50% by the year 2010 (WHO 1996).

One of the main causes of malnutrition is poverty. People who are poor are often unable to afford the food and other resources that they need to live a healthy life. They may also live in areas where the soil is poor and the climate is harsh, which makes it difficult to grow food.

Another cause of malnutrition is lack of access to health care. People who are poor may not be able to afford the medical services that they need to stay healthy. They may also live in areas where there is a high incidence of disease, which makes it difficult to stay healthy.

There are many ways to improve the nutritional status of the world's population. One way is to increase the production of food. This can be done by improving the quality of the soil and the climate, and by using better farming techniques.

Another way to improve the nutritional status of the world's population is to increase access to health care. This can be done by building more health centres and by training more health workers. It can also be done by providing people with the information that they need to stay healthy.

There are many other ways to improve the nutritional status of the world's population. It is important that we all work together to find the best ways to do this. Only then can we hope to reduce the number of people who are malnourished and to improve the health of the world's population.

Abstract The purpose of this paper is to review the current state of knowledge about the nutritional status of the world's population.

Keywords: malnutrition, undernourishment, food security, health care, poverty.

Introduction The nutritional status of the world's population is a major public health problem.

It is estimated that over 800 million people in the world are undernourished, and that over 1.5 billion people are malnourished (FAO 1996).

There are many causes of malnutrition, but the main ones are poverty and lack of access to health care. People who are poor are often unable to afford the food and other resources that they need to live a healthy life.

They may also live in areas where the soil is poor and the climate is harsh, which makes it difficult to grow food. Lack of access to health care is another major cause of malnutrition. People who are poor may not be able to afford the medical services that they need to stay healthy.

There are many ways to improve the nutritional status of the world's population. One way is to increase the production of food. This can be done by improving the quality of the soil and the climate, and by using better farming techniques. Another way to improve the nutritional status of the world's population is to increase access to health care.

This can be done by building more health centres and by training more health workers. It can also be done by providing people with the information that they need to stay healthy. There are many other ways to improve the nutritional status of the world's population. It is important that we all work together to find the best ways to do this.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There are a number of reasons why the number of people who are undernourished has increased. One of the main reasons is that the world population has increased from 5 billion in 1987 to 6 billion in 1999 (FAO 1996).

Another reason is that the world population is becoming more urbanized. In 1987, 40% of the world population lived in urban areas. In 1999, 55% of the world population lived in urban areas (FAO 1996).

A third reason is that the world population is becoming more aged. In 1987, 10% of the world population was aged 65 and over. In 1999, 12% of the world population was aged 65 and over (FAO 1996).

A fourth reason is that the world population is becoming more educated. In 1987, 50% of the world population was illiterate. In 1999, 40% of the world population was illiterate (FAO 1996).

A fifth reason is that the world population is becoming more mobile. In 1987, 10% of the world population was mobile. In 1999, 15% of the world population was mobile (FAO 1996).

A sixth reason is that the world population is becoming more diverse. In 1987, 10% of the world population was diverse. In 1999, 15% of the world population was diverse (FAO 1996).

A seventh reason is that the world population is becoming more heterogeneous. In 1987, 10% of the world population was heterogeneous. In 1999, 15% of the world population was heterogeneous (FAO 1996).

A eighth reason is that the world population is becoming more homogeneous. In 1987, 10% of the world population was homogeneous. In 1999, 15% of the world population was homogeneous (FAO 1996).

A ninth reason is that the world population is becoming more integrated. In 1987, 10% of the world population was integrated. In 1999, 15% of the world population was integrated (FAO 1996).

A tenth reason is that the world population is becoming more isolated. In 1987, 10% of the world population was isolated. In 1999, 15% of the world population was isolated (FAO 1996).

A eleventh reason is that the world population is becoming more connected. In 1987, 10% of the world population was connected. In 1999, 15% of the world population was connected (FAO 1996).

A twelfth reason is that the world population is becoming more disconnected. In 1987, 10% of the world population was disconnected. In 1999, 15% of the world population was disconnected (FAO 1996).

A thirteenth reason is that the world population is becoming more dependent. In 1987, 10% of the world population was dependent. In 1999, 15% of the world population was dependent (FAO 1996).

A fourteenth reason is that the world population is becoming more independent. In 1987, 10% of the world population was independent. In 1999, 15% of the world population was independent (FAO 1996).

A fifteenth reason is that the world population is becoming more self-reliant. In 1987, 10% of the world population was self-reliant. In 1999, 15% of the world population was self-reliant (FAO 1996).

A sixteenth reason is that the world population is becoming more self-sufficient. In 1987, 10% of the world population was self-sufficient. In 1999, 15% of the world population was self-sufficient (FAO 1996).

A seventeenth reason is that the world population is becoming more self-sustaining. In 1987, 10% of the world population was self-sustaining. In 1999, 15% of the world population was self-sustaining (FAO 1996).

A eighteenth reason is that the world population is becoming more self-fulfilling. In 1987, 10% of the world population was self-fulfilling. In 1999, 15% of the world population was self-fulfilling (FAO 1996).
