the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on three main principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; and (3) to ensure that older people are able to live independently and actively.

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

Another reason for the need to improve the efficiency of the public sector is the increasing demand for public services. This is due to a number of factors, including the increasing demand for health care, education, and social services.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

Finally, the efficiency of the public sector can be improved by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are not compromised, the need to ensure that public resources are not misused, and the need to ensure that public services are delivered in a timely and efficient manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is a major part of the economy, and it is essential that it be able to deliver public services in a timely and efficient manner.
