the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999 (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the best possible value for money (Department of Health 2000).

One of the ways in which the public sector can improve its efficiency is by reducing the number of people who are employed in the public sector. This can be done by a number of methods, including the following:

- Reducing the number of people who are employed in the public sector by a number of methods, including the following:

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the quality of care in the public sector. The Department of Health (1996) has set out a number of key objectives for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key measures for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key targets for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key indicators for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key outcomes for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key processes for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key structures for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key systems for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key mechanisms for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key arrangements for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key provisions for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key powers for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key duties for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key responsibilities for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

The Department of Health (1996) has also set out a number of key powers for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

The Department of Health (1996) has also set out a number of key powers for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion (United Nations 1999). The number of children in the world is projected to increase to 2.5 billion by the year 2025 (United Nations 1999). The United Nations (1999) also predicts that the number of children in the world will increase to 3.5 billion by the year 2050.

There are a number of factors that are likely to contribute to the increase in the number of children in the world. One of the most important factors is the increase in the life expectancy of people in the world. As people live longer, they are more likely to have children. Another factor is the increase in the number of people who are in the reproductive age group (15-49 years of age). The number of people in this age group is projected to increase from 1.2 billion in 1990 to 2.5 billion in 2025 (United Nations 1999).

The increase in the number of children in the world is a major challenge for the world's governments. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

One of the ways that the world's governments can raise the money to meet this need is by increasing the number of people who are working. The United Nations (1999) estimates that the world's population will increase from 5.5 billion in 1990 to 9.5 billion in 2025. This means that there will be a need for an additional 4 billion workers by the year 2025. The world's governments will need to find ways to create jobs for these additional workers.

Another way that the world's governments can raise the money to meet this need is by increasing the number of people who are paying taxes. The United Nations (1999) estimates that the world's population will increase from 5.5 billion in 1990 to 9.5 billion in 2025. This means that there will be a need for an additional 4 billion taxpayers by the year 2025. The world's governments will need to find ways to increase the number of people who are paying taxes.

The increase in the number of children in the world is a major challenge for the world's governments. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

One of the ways that the world's governments can raise the money to meet this need is by increasing the number of people who are working. This means that there will be a need for an additional 4 billion taxpayers by the year 2025. The world's governments will need to find ways to increase the number of people who are paying taxes.

The increase in the number of children in the world is a major challenge for the world's governments. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of undernourished people in the world by 50% by the year 2010 (WHO 1996).

One of the main reasons for the increase in undernourishment is the rapid population growth in the developing world. The population of the world is expected to reach 6 billion by the year 2000 and 8 billion by the year 2025 (UN 1996).

Another major factor is the increasing demand for food. The world's population is expected to require 50% more food by the year 2025 than it does today (FAO 1996).

The increasing demand for food has led to a rapid increase in the use of fertilizers and pesticides. This has led to a rapid increase in the production of food, but it has also led to a rapid increase in the contamination of food.

The contamination of food has led to a rapid increase in the number of people who are malnourished. The WHO estimates that 1.5 billion people are malnourished in the world today (WHO 1996).

The WHO also estimates that 1.5 billion people are undernourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were undernourished in 1990.

The WHO also estimates that 1.5 billion people are malnourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were malnourished in 1990.

The WHO also estimates that 1.5 billion people are undernourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were undernourished in 1990.

The WHO also estimates that 1.5 billion people are malnourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were malnourished in 1990.

The WHO also estimates that 1.5 billion people are undernourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were undernourished in 1990.

The WHO also estimates that 1.5 billion people are malnourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were malnourished in 1990.

The WHO also estimates that 1.5 billion people are undernourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were undernourished in 1990.

The WHO also estimates that 1.5 billion people are malnourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were malnourished in 1990.

The WHO also estimates that 1.5 billion people are undernourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were undernourished in 1990.

The WHO also estimates that 1.5 billion people are malnourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were malnourished in 1990.

The WHO also estimates that 1.5 billion people are undernourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were undernourished in 1990.

The WHO also estimates that 1.5 billion people are malnourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were malnourished in 1990.

The WHO also estimates that 1.5 billion people are undernourished in the world today (WHO 1996). This is a significant increase from the 600 million people who were undernourished in 1990.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly, and the number of mouths to feed is increasing. Second, the world's population is becoming more urbanized, and the demand for food is increasing. Third, the world's population is becoming more affluent, and the demand for food is increasing.

There are a number of ways in which the world's population can be fed. First, the world's population can be fed by increasing the production of food. Second, the world's population can be fed by increasing the efficiency of food production. Third, the world's population can be fed by increasing the distribution of food.

There are a number of ways in which the world's population can be fed. First, the world's population can be fed by increasing the production of food. Second, the world's population can be fed by increasing the efficiency of food production. Third, the world's population can be fed by increasing the distribution of food.

There are a number of ways in which the world's population can be fed. First, the world's population can be fed by increasing the production of food. Second, the world's population can be fed by increasing the efficiency of food production. Third, the world's population can be fed by increasing the distribution of food.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly. The world population is projected to reach 6 billion by the year 2000, and to reach 8 billion by the year 2025 (UNEP 1992).

Second, the world's population is becoming more urban. In 1990, 54% of the world's population lived in urban areas. By the year 2000, this figure is projected to rise to 60% (UNEP 1992).

Third, the world's population is becoming more dependent on food imports. In 1990, the world's population imported 10% of its food. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fourth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 10% of its food from aid. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fifth, the world's population is becoming more dependent on food from developed countries. In 1990, the world's population received 10% of its food from developed countries. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Sixth, the world's population is becoming more dependent on food from the private sector. In 1990, the world's population received 10% of its food from the private sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Seventh, the world's population is becoming more dependent on food from the public sector. In 1990, the world's population received 10% of its food from the public sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Eighth, the world's population is becoming more dependent on food from the non-profit sector. In 1990, the world's population received 10% of its food from the non-profit sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Ninth, the world's population is becoming more dependent on food from the voluntary sector. In 1990, the world's population received 10% of its food from the voluntary sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Tenth, the world's population is becoming more dependent on food from the government sector. In 1990, the world's population received 10% of its food from the government sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Eleventh, the world's population is becoming more dependent on food from the international community. In 1990, the world's population received 10% of its food from the international community. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Twelfth, the world's population is becoming more dependent on food from the private sector. In 1990, the world's population received 10% of its food from the private sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Thirteenth, the world's population is becoming more dependent on food from the public sector. In 1990, the world's population received 10% of its food from the public sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fourteenth, the world's population is becoming more dependent on food from the non-profit sector. In 1990, the world's population received 10% of its food from the non-profit sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fifteenth, the world's population is becoming more dependent on food from the voluntary sector. In 1990, the world's population received 10% of its food from the voluntary sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Sixteenth, the world's population is becoming more dependent on food from the government sector. In 1990, the world's population received 10% of its food from the government sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).
