the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has identified the need to develop a new approach to the care of older people, one that is based on the principles of person-centred care. This approach is based on the idea that older people should be treated as individuals, with their own needs and preferences. It is a approach that is based on the idea that older people should be treated as individuals, with their own needs and preferences. It is a approach that is based on the idea that older people should be treated as individuals, with their own needs and preferences.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

Another reason for the need to improve the efficiency of the public sector is the increasing demand for public services. This is due to a number of factors, including the increasing demand for health care, education, and social services.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

Finally, the efficiency of the public sector can be improved by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are not compromised, the need to ensure that public resources are used efficiently, and the need to ensure that public services are delivered in a timely and effective manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is a major part of the economy, and it is essential that it be able to deliver public services in a timely and effective manner.

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the needs of people with mental health problems. The Department of Health (2000) has set out a vision for the future of mental health care, which includes a commitment to improve the lives of people with mental health problems and to ensure that they are treated with dignity and respect.

One of the key challenges facing mental health services is how to ensure that people with mental health problems are able to live their lives to the full and to participate in the community. This requires a range of services, including mental health care, social support, and housing.

One of the ways in which mental health services can improve the lives of people with mental health problems is by providing them with the opportunity to participate in the community. This can be done through a range of activities, including social support groups, day centres, and housing.

One of the key challenges facing mental health services is how to ensure that people with mental health problems are able to live their lives to the full and to participate in the community. This requires a range of services, including mental health care, social support, and housing.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a vision for the future of health and social care for older people, and the Department of Health (2001) has set out a strategy for the future of health and social care for older people. The strategy is based on the following principles:

- Older people should be able to live in their own homes for as long as possible.
- Older people should be able to access the services they need to live well.
- Older people should be able to participate in decisions about their care and services.
- Older people should be able to live in a safe and secure environment.
- Older people should be able to live in a community where they feel welcome and valued.

The strategy is based on the following principles: older people should be able to live in their own homes for as long as possible; older people should be able to access the services they need to live well; older people should be able to participate in decisions about their care and services; older people should be able to live in a safe and secure environment; older people should be able to live in a community where they feel welcome and valued.

The strategy is based on the following principles: older people should be able to live in their own homes for as long as possible; older people should be able to access the services they need to live well; older people should be able to participate in decisions about their care and services; older people should be able to live in a safe and secure environment; older people should be able to live in a community where they feel welcome and valued.

The strategy is based on the following principles: older people should be able to live in their own homes for as long as possible; older people should be able to access the services they need to live well; older people should be able to participate in decisions about their care and services; older people should be able to live in a safe and secure environment; older people should be able to live in a community where they feel welcome and valued.

The strategy is based on the following principles: older people should be able to live in their own homes for as long as possible; older people should be able to access the services they need to live well; older people should be able to participate in decisions about their care and services; older people should be able to live in a safe and secure environment; older people should be able to live in a community where they feel welcome and valued.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key priorities for the NHS to meet the needs of older people. These priorities are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are self-employed, with 1.5 million self-employed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are retired, with 1.5 million retired people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are students, with 1.5 million students employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are parents, with 1.5 million parents employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are carers, with 1.5 million carers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are volunteers, with 1.5 million volunteers employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

The Department of Health (2000) has also set out a number of measures to achieve these objectives. These measures are: (1) to increase the number of health professionals who are trained to care for older people; (2) to increase the number of health professionals who are trained to provide social care; (3) to increase the number of health professionals who are trained to provide housing; and (4) to increase the number of health professionals who are trained to provide transport.

The Department of Health (2000) has also set out a number of measures to ensure that older people are treated with respect and dignity. These measures are: (1) to ensure that older people are able to live independently; (2) to ensure that older people are able to participate in the decisions that affect their lives; and (3) to ensure that older people are able to live in a safe and secure environment.

The Department of Health (2000) has also set out a number of measures to ensure that older people are able to live independently. These measures are: (1) to ensure that older people are able to live in their own homes; (2) to ensure that older people are able to live in a safe and secure environment; and (3) to ensure that older people are able to live in a community.

The Department of Health (2000) has also set out a number of measures to ensure that older people are able to participate in the decisions that affect their lives. These measures are: (1) to ensure that older people are able to live in a safe and secure environment; (2) to ensure that older people are able to live in a community; and (3) to ensure that older people are able to live in a safe and secure environment.

The Department of Health (2000) has also set out a number of measures to ensure that older people are able to live in a safe and secure environment. These measures are: (1) to ensure that older people are able to live in a safe and secure environment; (2) to ensure that older people are able to live in a community; and (3) to ensure that older people are able to live in a safe and secure environment.

The Department of Health (2000) has also set out a number of measures to ensure that older people are able to live in a community. These measures are: (1) to ensure that older people are able to live in a safe and secure environment; (2) to ensure that older people are able to live in a community; and (3) to ensure that older people are able to live in a safe and secure environment.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 7.5 million by 2020, and the number of people aged 75 and over to 5.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' of health and social care for the ageing population. This paradigm is based on the principles of 'active ageing', which is defined as the process of optimising the health and social care needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' of health and social care for the ageing population.

The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are self-employed, with 1.5 million self-employed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are retired, with 1.5 million retired people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are students, with 1.5 million students employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are housewives, with 1.5 million housewives employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are pensioners, with 1.5 million pensioners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are disabled, with 1.5 million disabled people employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in decisions about their health and social care. The strategy is being implemented through a number of measures, including: (1) increasing the number of health and social care professionals who specialise in the care of older people; (2) improving the training and education of health and social care professionals; and (3) improving the coordination of health and social care services.

The Department of Health (2000) has also published a number of guidance documents, which set out the standards for the care of older people. These documents are: (1) *Guidance on the Care of Older People* (Department of Health 2000a); (2) *Guidance on the Care of Older People with Mental Health Problems* (Department of Health 2000b); and (3) *Guidance on the Care of Older People with Physical Health Problems* (Department of Health 2000c). These documents are being used by health and social care professionals to ensure that the care of older people is of the highest quality.

The Department of Health (2000) has also published a number of reports, which set out the findings of research into the health and social care of older people. These reports are: (1) *The Health and Social Care Needs of Older People* (Department of Health 2000d); (2) *The Health and Social Care Needs of Older People with Mental Health Problems* (Department of Health 2000e); and (3) *The Health and Social Care Needs of Older People with Physical Health Problems* (Department of Health 2000f). These reports are being used by health and social care professionals to ensure that the care of older people is of the highest quality.

The Department of Health (2000) has also published a number of guidance documents, which set out the standards for the care of older people. These documents are: (1) *Guidance on the Care of Older People* (Department of Health 2000a); (2) *Guidance on the Care of Older People with Mental Health Problems* (Department of Health 2000b); and (3) *Guidance on the Care of Older People with Physical Health Problems* (Department of Health 2000c). These documents are being used by health and social care professionals to ensure that the care of older people is of the highest quality.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in the decisions that affect their lives.

The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in the decisions that affect their lives. The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the private sector has increased by 1.7 million (1990–1999).

There is a growing emphasis on the need to improve the quality of services provided by the public sector. This has led to a number of initiatives, including the introduction of performance indicators, the establishment of public sector ombudsmen, and the implementation of various quality management systems.

The aim of this paper is to review the literature on the quality of public sector services and to identify the factors that influence the quality of these services.

The paper is organized as follows. Section 2 discusses the concept of quality and the various dimensions of quality. Section 3 reviews the literature on the quality of public sector services.

Section 4 discusses the factors that influence the quality of public sector services. Section 5 discusses the implications of the findings for practice.

Section 6 discusses the implications of the findings for policy. Section 7 discusses the implications of the findings for research.

Section 8 discusses the implications of the findings for the future. Section 9 discusses the implications of the findings for the public sector.

Section 10 discusses the implications of the findings for the private sector. Section 11 discusses the implications of the findings for the third sector.

Section 12 discusses the implications of the findings for the public sector. Section 13 discusses the implications of the findings for the private sector.

Section 14 discusses the implications of the findings for the third sector. Section 15 discusses the implications of the findings for the public sector.

Section 16 discusses the implications of the findings for the private sector. Section 17 discusses the implications of the findings for the third sector.

Section 18 discusses the implications of the findings for the public sector. Section 19 discusses the implications of the findings for the private sector.

Section 20 discusses the implications of the findings for the third sector. Section 21 discusses the implications of the findings for the public sector.

Section 22 discusses the implications of the findings for the private sector. Section 23 discusses the implications of the findings for the third sector.

Section 24 discusses the implications of the findings for the public sector. Section 25 discusses the implications of the findings for the private sector.

Section 26 discusses the implications of the findings for the third sector. Section 27 discusses the implications of the findings for the public sector.

Section 28 discusses the implications of the findings for the private sector. Section 29 discusses the implications of the findings for the third sector.

Section 30 discusses the implications of the findings for the public sector. Section 31 discusses the implications of the findings for the private sector.

Section 32 discusses the implications of the findings for the third sector. Section 33 discusses the implications of the findings for the public sector.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the private sector has increased by 1.7 million (1990–1999).

There is a growing emphasis on the need to improve the quality of care and services provided by the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, the introduction of the NHS Direct website, and the introduction of the NHS Choice and Control Fund.

The Health Care Act 1999 introduced a number of changes to the way in which the NHS is run. These changes include the introduction of the NHS Direct website, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Patient Choice Scheme.

The NHS Direct website is a free service that provides information and advice on a wide range of health problems. It is available 24 hours a day, 7 days a week.

The NHS Choice and Control Fund is a fund that allows patients to choose the hospital or service that they want to use. This fund is available to all patients who are registered with a General Practitioner (GP).

The NHS Patient Choice Scheme is a scheme that allows patients to choose the hospital or service that they want to use. This scheme is available to all patients who are registered with a General Practitioner (GP).

The NHS Patient Choice Scheme is a scheme that allows patients to choose the hospital or service that they want to use. This scheme is available to all patients who are registered with a General Practitioner (GP).

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society. The strategy is based on the following key objectives: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.
