the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.5 billion to 0.7 billion (United Nations 2002). The number of people aged 65 and over is projected to increase to 1.2 billion by 2050 (United Nations 2002).

There is a growing awareness of the need to address the needs of older people in the workplace. The World Health Organization (WHO) has identified the need for a 'healthy ageing' approach to the workplace (WHO 2002). The WHO defines 'healthy ageing' as 'the process of developing and maintaining the functional ability that enables older people to live the lives they want' (WHO 2002, p. 1).

The WHO has identified five domains of functional ability: physical, mental, social, emotional, and spiritual. The WHO has identified the need for a 'healthy ageing' approach to the workplace that addresses all five domains of functional ability (WHO 2002).

The WHO has identified the need for a 'healthy ageing' approach to the workplace that addresses all five domains of functional ability (WHO 2002). The WHO has identified the need for a 'healthy ageing' approach to the workplace that addresses all five domains of functional ability (WHO 2002).

The WHO has identified the need for a 'healthy ageing' approach to the workplace that addresses all five domains of functional ability (WHO 2002). The WHO has identified the need for a 'healthy ageing' approach to the workplace that addresses all five domains of functional ability (WHO 2002).

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a friend, with 1.5 million people living with a friend employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a neighbour, with 1.5 million people living with a neighbour employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.4 billion to 0.6 billion (United Nations, 2002). The United Nations predicts that by 2050, the number of people aged 65 and over will have increased to 1.1 billion, and the number of people under 15 years of age will have decreased to 1.1 billion (United Nations, 2002).

There are a number of factors that are likely to contribute to the increase in the number of people aged 65 and over. One of the main factors is the increase in life expectancy. In 1990, the life expectancy at birth was 47 years for men and 51 years for women. By 2050, the life expectancy at birth is predicted to be 74 years for men and 79 years for women (United Nations, 2002).

Another factor is the decrease in fertility. In 1990, the total fertility rate was 4.7 children per woman. By 2050, the total fertility rate is predicted to be 1.5 children per woman (United Nations, 2002). This decrease in fertility is due to a number of factors, including the increase in the age at which women have children, and the decrease in the number of children born to each woman.

The increase in the number of people aged 65 and over is a global phenomenon. In 1990, there were 0.4 billion people aged 65 and over in the world. By 2050, there are predicted to be 1.1 billion people aged 65 and over in the world (United Nations, 2002). This increase is particularly pronounced in developed countries, where the number of people aged 65 and over is predicted to increase from 0.2 billion in 1990 to 0.6 billion in 2050.

The increase in the number of people aged 65 and over has a number of implications for society. One of the main implications is the increase in the demand for social services. As the number of people aged 65 and over increases, the demand for social services such as housing, healthcare, and social security will also increase. This increase in demand will place a significant strain on government resources.

Another implication is the increase in the need for long-term care. As the number of people aged 65 and over increases, the need for long-term care will also increase. This is because a large proportion of people aged 65 and over will require long-term care in their later years. This need for long-term care will place a significant strain on government resources.

The increase in the number of people aged 65 and over is a challenge for society. It is a challenge that requires a coordinated response from governments, businesses, and individuals. Governments need to increase their spending on social services and long-term care. Businesses need to develop new products and services that meet the needs of the aging population. Individuals need to plan for their own retirement and long-term care needs.

There are a number of ways in which society can respond to the increase in the number of people aged 65 and over. One way is to increase the age at which people retire. This would reduce the number of people who are dependent on social security. Another way is to increase the number of people who work in the private sector. This would reduce the demand for social services.

The increase in the number of people aged 65 and over is a challenge for society. It is a challenge that requires a coordinated response from governments, businesses, and individuals. Governments need to increase their spending on social services and long-term care. Businesses need to develop new products and services that meet the needs of the aging population. Individuals need to plan for their own retirement and long-term care needs.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995).
