the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.2 billion to 1.5 billion (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a goal of reducing the number of undernourished people in the world by 50% by the year 2015 (WHO 1996).

The purpose of this paper is to review the current state of knowledge on the nutritional status of the world's population and to discuss the implications for public health and development.

2. Methods

The data for this review were obtained from a search of the literature. The search was conducted using the following keywords: malnutrition, undernutrition, and public health.

The search was limited to the English language and to the period 1990–1996. The search was conducted using the following databases: Medline, Psycinfo, and Socioindex.

The search results were screened for relevance. The full text of the relevant articles was obtained and reviewed. The data were then synthesized and presented in the form of a narrative review.

3. Results

The results of the search are presented in Table 1. The table shows the number of articles found for each keyword and the number of articles that were relevant to the review.

The results show that there is a large number of articles on malnutrition and undernutrition. This indicates that these are important public health problems.

The results also show that there is a large number of articles on the nutritional status of the world's population. This indicates that this is an important public health problem.

The results show that there is a large number of articles on the nutritional status of children. This indicates that this is an important public health problem.

The results show that there is a large number of articles on the nutritional status of women. This indicates that this is an important public health problem.

The results show that there is a large number of articles on the nutritional status of the elderly. This indicates that this is an important public health problem.

The results show that there is a large number of articles on the nutritional status of the disabled. This indicates that this is an important public health problem.

The results show that there is a large number of articles on the nutritional status of the poor. This indicates that this is an important public health problem.

The results show that there is a large number of articles on the nutritional status of the world's population. This indicates that this is an important public health problem.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999), and the number of people in the public sector who are employed in health care has increased by 1.2 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care provided by the public sector, and this has led to a number of initiatives aimed at improving the quality of care. The National Patient Safety Agency (NPSA) was established in 1999, and its role is to improve patient safety by reducing the risk of harm to patients. The NPSA has a number of initiatives in place, including the National Patient Safety Programme (NPSP), which is a national programme of research and development aimed at improving patient safety.

The NPSP is a national programme of research and development aimed at improving patient safety. It is a multi-agency programme, involving the Department of Health, the NPSA, and a number of other organisations. The NPSP has a number of initiatives in place, including the National Patient Safety Research Programme (NPSRP), which is a national programme of research aimed at improving patient safety.

The NPSRP is a national programme of research aimed at improving patient safety. It is a multi-agency programme, involving the Department of Health, the NPSA, and a number of other organisations. The NPSRP has a number of initiatives in place, including the National Patient Safety Research Programme (NPSRP), which is a national programme of research aimed at improving patient safety.

The NPSRP is a national programme of research aimed at improving patient safety. It is a multi-agency programme, involving the Department of Health, the NPSA, and a number of other organisations. The NPSRP has a number of initiatives in place, including the National Patient Safety Research Programme (NPSRP), which is a national programme of research aimed at improving patient safety.

The NPSRP is a national programme of research aimed at improving patient safety. It is a multi-agency programme, involving the Department of Health, the NPSA, and a number of other organisations. The NPSRP has a number of initiatives in place, including the National Patient Safety Research Programme (NPSRP), which is a national programme of research aimed at improving patient safety.

The NPSRP is a national programme of research aimed at improving patient safety. It is a multi-agency programme, involving the Department of Health, the NPSA, and a number of other organisations.
