the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Office of National Statistics, 2000).

There is a growing awareness of the need to address the health care needs of the ageing population. The Department of Health (1999) has set out a strategy for the future of health care for older people. The strategy is based on the following principles:

- The health care system should be able to meet the needs of older people in a timely and effective manner.
- The health care system should be able to meet the needs of older people in a way that is consistent with their wishes and preferences.
- The health care system should be able to meet the needs of older people in a way that is consistent with the values and beliefs of the community.

The strategy also sets out a number of key objectives for the health care system to achieve by 2010:

- To ensure that older people have access to the services they need to live well.
- To ensure that older people are able to live independently for as long as possible.
- To ensure that older people are able to participate in the decisions that affect their lives.

The strategy also sets out a number of key actions for the health care system to take in order to achieve these objectives:

- To improve the quality of care for older people.
- To improve the efficiency of the health care system.
- To improve the accessibility of the health care system.

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of the ageing population. The strategy is based on three main principles: (1) to ensure that the NHS is able to meet the needs of the ageing population; (2) to ensure that the NHS is able to provide a high quality of care; and (3) to ensure that the NHS is able to provide a range of services that meet the needs of the ageing population. The strategy is based on the following assumptions: (1) that the NHS is able to meet the needs of the ageing population; (2) that the NHS is able to provide a high quality of care; and (3) that the NHS is able to provide a range of services that meet the needs of the ageing population.
