the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the lower social classes, with 1.5 million people from the lower social classes employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a great-grandchild, with 1.5 million people living with a great-grandchild employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-grandchild, with 1.5 million people living with a great-grandchild employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly. The world population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1994). This increase in population will place a greater demand on the world's food resources.

Second, the world's food resources are being depleted. The world's forests are being cleared at a rate of 100,000 km<sup>2</sup> per year (FAO 1996). This loss of forest land is reducing the world's capacity to produce food. The world's fisheries are also being depleted. The world's fish stocks are being overfished, and this is reducing the world's capacity to produce food.

Third, the world's food resources are being distributed unevenly. The world's food resources are concentrated in a few countries, and this is leading to a growing food crisis in many developing countries. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Fourth, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Fifth, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Sixth, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Seventh, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Eighth, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Ninth, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Tenth, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Eleventh, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.

Twelfth, the world's food resources are being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources. The world's food resources are also being used in a way that is not sustainable. The world's food resources are being used in a way that is depleting the world's soil and water resources.
