the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing demand for public services. The population of the UK is increasing, and the demand for public services is increasing. This has led to a number of challenges for the public sector, including the need to find ways to deliver services more efficiently, and the need to find ways to raise the revenue that is required to fund public services.

One of the main ways in which the public sector has been able to improve its efficiency is by introducing competition. This has led to a number of changes in the way that public services are delivered, and has led to a number of improvements in the efficiency of the public sector. For example, the introduction of competition has led to a number of improvements in the quality of public services, and has led to a number of improvements in the efficiency of the public sector.

Another way in which the public sector has been able to improve its efficiency is by restructuring public services. This has led to a number of changes in the way that public services are delivered, and has led to a number of improvements in the efficiency of the public sector. For example, the restructuring of public services has led to a number of improvements in the quality of public services, and has led to a number of improvements in the efficiency of the public sector.

Finally, the public sector has been able to improve its efficiency by introducing new management practices. This has led to a number of changes in the way that public services are delivered, and has led to a number of improvements in the efficiency of the public sector. For example, the introduction of new management practices has led to a number of improvements in the quality of public services, and has led to a number of improvements in the efficiency of the public sector.

These initiatives have led to a number of improvements in the efficiency of the public sector, and have led to a number of improvements in the quality of public services. However, there is still a need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This will require a number of further initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing demand for public services. The population of the UK is increasing, and the demand for public services is increasing. This has led to a number of challenges for the public sector, including the need to find ways to deliver services more efficiently, and the need to find ways to raise the revenue that is required to fund public services.

One of the main ways in which the public sector has been able to improve its efficiency is by introducing competition. This has led to a number of changes in the way that public services are delivered, and has led to a number of improvements in the efficiency of the public sector. For example, the introduction of competition has led to a number of improvements in the quality of public services, and has led to a number of improvements in the efficiency of the public sector.

Another way in which the public sector has been able to improve its efficiency is by restructuring public services. This has led to a number of changes in the way that public services are delivered, and has led to a number of improvements in the efficiency of the public sector. For example, the restructuring of public services has led to a number of improvements in the quality of public services, and has led to a number of improvements in the efficiency of the public sector.

Finally, the public sector has been able to improve its efficiency by introducing new management practices. This has led to a number of changes in the way that public services are delivered, and has led to a number of improvements in the efficiency of the public sector. For example, the introduction of new management practices has led to a number of improvements in the quality of public services, and has led to a number of improvements in the efficiency of the public sector.
