the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the quality of public services and to ensure that the public sector is efficient and effective. This has led to a number of initiatives, including the introduction of performance indicators, the establishment of public sector bodies, and the implementation of public sector reform.

The purpose of this paper is to examine the impact of public sector reform on the quality of public services and to identify the factors that influence the success of public sector reform.

The paper is organized as follows. Section 2 discusses the background to public sector reform. Section 3 discusses the impact of public sector reform on the quality of public services. Section 4 discusses the factors that influence the success of public sector reform. Section 5 discusses the conclusions of the paper.

2. Background to public sector reform

The public sector has been the subject of a number of reforms in the UK since the 1990s. These reforms have been aimed at improving the efficiency and effectiveness of the public sector and at reducing the cost of public services.

The first major reform was the introduction of the Public Finance Review (PFR) in 1990. The PFR was a comprehensive review of the public sector's finances and it identified a number of areas where the public sector was inefficient and ineffective.

The second major reform was the establishment of public sector bodies (PSBs) in 1991. PSBs are public sector organizations that are established to provide a specific public service. They are subject to a number of controls, including the requirement to publish an annual report and to be subject to a public inquiry.

The third major reform was the implementation of public sector reform (PSR) in 1992. PSR was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

PSR was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The fourth major reform was the introduction of the Public Sector Reform Bill (PSRB) in 1993. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The fifth major reform was the implementation of the PSRB in 1994. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The sixth major reform was the implementation of the PSRB in 1995. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The seventh major reform was the implementation of the PSRB in 1996. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The eighth major reform was the implementation of the PSRB in 1997. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The ninth major reform was the implementation of the PSRB in 1998. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The tenth major reform was the implementation of the PSRB in 1999. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The eleventh major reform was the implementation of the PSRB in 2000. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

The twelfth major reform was the implementation of the PSRB in 2001. The PSRB was a comprehensive reform of the public sector that aimed to improve the efficiency and effectiveness of the public sector and to reduce the cost of public services.

The PSRB was implemented in a number of stages. The first stage was the implementation of the PFR. The second stage was the implementation of the PSBs. The third stage was the implementation of the PSR.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector can be improved. This is important because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total workforce.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector can be improved. This is important because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total workforce.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995) and the number of people in the private sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995).

There is a growing emphasis on the need for the public sector to be more cost-effective and to provide better value for money. This has led to a number of initiatives to improve the efficiency of the public sector, including the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the main reasons for the need for reform is the increasing pressure on public services to provide better value for money. This is due to a number of factors, including the increasing cost of public services, the need to improve the quality of public services, and the need to ensure that public services are efficient and effective.

There are a number of ways in which the public sector can be reformed to improve its efficiency and effectiveness. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the main ways in which the public sector can be reformed is by introducing competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the public sector can be reformed is by restructuring public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the public sector can be reformed is by introducing new management practices. This can be done by introducing new management systems, or by introducing new management practices.

There are a number of advantages to reforming the public sector. These include the potential to improve the efficiency and effectiveness of public services, the potential to reduce the cost of public services, and the potential to improve the quality of public services.

However, there are also a number of disadvantages to reforming the public sector. These include the potential to increase the cost of public services, the potential to reduce the quality of public services, and the potential to create a two-tier system of public services.

It is important to weigh up the advantages and disadvantages of reforming the public sector before making a decision. This will ensure that the best possible outcome is achieved for the public sector.

There are a number of factors that will influence the success of public sector reform. These include the quality of the reform, the support of the public, and the support of the government.

It is important to ensure that the reform is of high quality, that the public is supported, and that the government is supported. This will ensure that the reform is successful.

There are a number of ways in which the public sector can be reformed to improve its efficiency and effectiveness. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the main ways in which the public sector can be reformed is by introducing competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This pressure is caused by a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing need for public services.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done in a number of ways, including the privatization of public services, the introduction of competitive tendering, and the introduction of competition for public contracts.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done in a number of ways, including the merging of public services, the restructuring of public organizations, and the introduction of new public services.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to identify areas where improvements can be made.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the needs of people with mental health problems, and a number of initiatives have been developed to support this. The Mental Health Act 1983, the Mental Health Act 1994, and the Mental Health Act 2003 have all been passed by the UK Parliament. The Mental Health Act 2003 is the most recent and comprehensive of these, and it is this Act that is the focus of this paper.

The Mental Health Act 2003 is a complex piece of legislation, and it is not possible to cover all of its provisions in this paper. However, the following sections provide an overview of the key provisions of the Act.

The first section of the Act, Section 1, defines the term 'mental disorder'. This is a broad definition, and it includes a wide range of conditions, from mild mental health problems to severe mental illness.

Section 2 of the Act defines the term 'sectioned'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act. This section also sets out the criteria for sectioning a person.

Section 3 of the Act defines the term 'detention'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act. This section also sets out the criteria for detaining a person.

Section 4 of the Act defines the term 'detention for assessment'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of assessment. This section also sets out the criteria for detaining a person for assessment.

Section 5 of the Act defines the term 'detention for treatment'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of treatment. This section also sets out the criteria for detaining a person for treatment.

Section 6 of the Act defines the term 'detention for care'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of care. This section also sets out the criteria for detaining a person for care.

Section 7 of the Act defines the term 'detention for protection'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of protection. This section also sets out the criteria for detaining a person for protection.

Section 8 of the Act defines the term 'detention for research'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of research. This section also sets out the criteria for detaining a person for research.

Section 9 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 10 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 11 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 12 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 13 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 14 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 15 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 16 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 17 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 18 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 19 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 20 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 21 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 22 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 23 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

Section 24 of the Act defines the term 'detention for medical purposes'. This is a legal term, and it refers to a person who has been detained under the provisions of the Act for the purpose of medical treatment. This section also sets out the criteria for detaining a person for medical purposes.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the lower social classes, with 1.5 million people from the lower social classes employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a partnership, with 1.5 million people in a partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a family, with 1.5 million people in a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a household, with 1.5 million people in a household employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a community, with 1.5 million people in a community employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a country, with 1.5 million people in a country employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a region, with 1.5 million people in a region employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the needs of people with mental health problems. The Department of Health (2000) has set out a vision for the future of mental health services, which includes a focus on prevention, early intervention and recovery.

The aim of this paper is to explore the experiences of people with mental health problems who are involved in the criminal justice system.

The paper is organized as follows. First, we discuss the prevalence of mental health problems in the criminal justice system.

Second, we discuss the challenges faced by people with mental health problems who are involved in the criminal justice system.

Third, we discuss the role of mental health services in the criminal justice system.

Fourth, we discuss the need for a multi-agency approach to addressing the needs of people with mental health problems who are involved in the criminal justice system.

Fifth, we discuss the need for a focus on prevention, early intervention and recovery.

Sixth, we discuss the need for a focus on the needs of individual people.

Finally, we discuss the need for a focus on the needs of the community.

The paper concludes with a discussion of the implications of the findings for practice.

The paper is based on a review of the literature and on interviews with people with mental health problems who are involved in the criminal justice system.

The review of the literature identified a number of key issues that need to be addressed in order to improve the experiences of people with mental health problems who are involved in the criminal justice system.

These issues include the need for a multi-agency approach, the need for a focus on prevention, early intervention and recovery, and the need for a focus on the needs of individual people.

The interviews with people with mental health problems who are involved in the criminal justice system identified a number of key issues that need to be addressed in order to improve the experiences of people with mental health problems who are involved in the criminal justice system.

These issues include the need for a multi-agency approach, the need for a focus on prevention, early intervention and recovery, and the need for a focus on the needs of individual people.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This pressure is caused by a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing need for public services.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done in a number of ways, including the privatization of public services, the introduction of competitive tendering, and the introduction of public-private partnerships.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done in a number of ways, including the merging of public services, the restructuring of public services, and the introduction of new public services.

Finally, the efficiency of the public sector can be improved by the introduction of new management practices. These practices can include the introduction of new management systems, the introduction of new management techniques, and the introduction of new management tools.

There are a number of challenges associated with improving the efficiency of the public sector. These challenges include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector can be improved. This consensus is based on a number of factors, including the increasing pressure on public resources, the need to ensure that public services are delivered in a cost-effective manner, and the need to ensure that public services are delivered in a timely manner.

The public sector has also become an important employer of people who are over 145 years of age, with 0% of public sector employees being over 145 in 1995 (compared with 0% in 1980). The public sector has also become an important employer of people who are over 150 years of age, with 0% of public sector employees being over 150 in 1995 (compared with 0% in 1980). The public sector has also become an important employer of people who are over 155 years of age, with 0% of public sector employees being over 155 in 1995 (compared with 0% in 1980).

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.
