the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 2001). The number of people who are malnourished has increased from 1.1 billion to 1.5 billion (FAO 2001).

There is a growing awareness of the need to improve the nutritional status of the world's population. The World Health Organization (WHO) has set a target of reducing the number of undernourished people in the world by 50% by the year 2015 (WHO 2001).

One of the main causes of malnutrition is the lack of access to adequate food. This is often due to poverty, which prevents people from being able to afford to buy enough food. Another cause is the lack of access to land, which prevents people from being able to grow their own food.

There are a number of ways in which the nutritional status of the world's population can be improved. One way is to increase the production of food. This can be done by increasing the area of land that is used for agriculture, or by increasing the yield of crops.

Another way to improve the nutritional status of the world's population is to improve the distribution of food. This can be done by ensuring that food is available to all people, and that it is distributed in a way that is fair and equitable.

There are a number of other ways in which the nutritional status of the world's population can be improved. These include improving the quality of food, and ensuring that people have access to the nutrients that they need.

It is important to note that improving the nutritional status of the world's population is not just a matter of providing food. It is also a matter of ensuring that people have access to the nutrients that they need. This can be done by ensuring that people have access to a variety of foods, and that they are able to absorb the nutrients that they eat.

There are a number of ways in which the nutritional status of the world's population can be improved. These include increasing the production of food, improving the distribution of food, and ensuring that people have access to the nutrients that they need.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil union, with 1.5 million people in a civil union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 2001). The number of people who are obese has increased from 100 million in 1975 to 300 million in 2000 (WHO 2000).

Obesity is a complex condition, with many causes. It is a result of an imbalance between energy intake and energy expenditure. The energy intake is determined by the amount of food and drink consumed, and the energy expenditure is determined by the amount of physical activity.

Obesity is a major public health problem, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.

## Obesity and health

Obesity is a major risk factor for many chronic diseases, including heart disease, stroke, diabetes, and certain types of cancer. It is also associated with a higher risk of death from all causes.

The World Health Organization (WHO) defines obesity as a body mass index (BMI) of 30 or greater. BMI is a measure of body fat based on height and weight. It is calculated by dividing weight in kilograms by height in metres squared.

Obesity is a complex condition, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.

## Genetics and obesity

Obesity is a complex condition, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.

Obesity is a complex condition, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.

## Environment and obesity

Obesity is a complex condition, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.

Obesity is a complex condition, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.

## Conclusion

Obesity is a complex condition, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.

Obesity is a complex condition, and it is important to understand its causes in order to develop effective interventions. This paper will review the current evidence on the causes of obesity, and will discuss the implications for public health.
