There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' of care for the ageing population, one that is based on a 'continuum of care' rather than a 'dual system' of care for the young and old. The 'new paradigm' is based on the principle that care should be tailored to the needs of the individual, rather than being based on age.
