the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 50% of the public sector workforce being female in 1995. The public sector has also become an important employer of people with disabilities, with 10% of the public sector workforce being disabled in 1995.

The public sector has also become an important employer of people from ethnic minorities, with 10% of the public sector workforce being from ethnic minorities in 1995. The public sector has also become an important employer of people from the lower socio-economic classes, with 10% of the public sector workforce being from the lower socio-economic classes in 1995.

The public sector has also become an important employer of people with low qualifications, with 10% of the public sector workforce having no qualifications in 1995. The public sector has also become an important employer of people with low skills, with 10% of the public sector workforce having no skills in 1995.

The public sector has also become an important employer of people with low income, with 10% of the public sector workforce having a low income in 1995. The public sector has also become an important employer of people with low housing, with 10% of the public sector workforce having low housing in 1995.

The public sector has also become an important employer of people with low health, with 10% of the public sector workforce having low health in 1995. The public sector has also become an important employer of people with low education, with 10% of the public sector workforce having low education in 1995.

The public sector has also become an important employer of people with low employment, with 10% of the public sector workforce having low employment in 1995. The public sector has also become an important employer of people with low income, with 10% of the public sector workforce having low income in 1995.

The public sector has also become an important employer of people with low housing, with 10% of the public sector workforce having low housing in 1995. The public sector has also become an important employer of people with low health, with 10% of the public sector workforce having low health in 1995.

The public sector has also become an important employer of people with low education, with 10% of the public sector workforce having low education in 1995. The public sector has also become an important employer of people with low employment, with 10% of the public sector workforce having low employment in 1995.

The public sector has also become an important employer of people with low income, with 10% of the public sector workforce having low income in 1995. The public sector has also become an important employer of people with low housing, with 10% of the public sector workforce having low housing in 1995.

The public sector has also become an important employer of people with low health, with 10% of the public sector workforce having low health in 1995. The public sector has also become an important employer of people with low education, with 10% of the public sector workforce having low education in 1995.

100%

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 2002). The United Nations predicts that by 2050, the number of people aged 65 and over will have increased to 1.2 billion, and the number of people under 15 years of age will have decreased to 1.1 billion (United Nations, 2002).

There are a number of factors that are likely to contribute to the increase in the number of people aged 65 and over. One of the main factors is the increase in life expectancy. In 1990, the life expectancy at birth was 47 years for men and 51 years for women. By 2050, the life expectancy at birth is predicted to be 74 years for men and 79 years for women (United Nations, 2002). This increase in life expectancy is due to a number of factors, including improvements in medical care, better nutrition, and a more stable environment.

Another factor that is likely to contribute to the increase in the number of people aged 65 and over is the decrease in the number of people in the working age population. In 1990, the number of people aged 15 and over was 1.5 billion. By 2050, the number of people aged 15 and over is predicted to be 1.1 billion (United Nations, 2002). This decrease in the number of people in the working age population is due to a number of factors, including a decrease in the birth rate and a decrease in the number of people who are able to work for long periods of time.

The increase in the number of people aged 65 and over has a number of implications for society. One of the main implications is the need for more social security and health care services. As the number of people aged 65 and over increases, the number of people who are dependent on social security and health care services will also increase. This will place a greater burden on governments and society as a whole to provide these services.

Another implication of the increase in the number of people aged 65 and over is the need for more housing and care services. As the number of people aged 65 and over increases, the number of people who need housing and care services will also increase. This will place a greater burden on governments and society as a whole to provide these services.

The increase in the number of people aged 65 and over is a major challenge for society. It is important that governments and society as a whole take steps to address this challenge. This includes providing more social security and health care services, more housing and care services, and more opportunities for older people to participate in society.

There are a number of ways in which governments and society as a whole can address the challenge of the increase in the number of people aged 65 and over. One way is to provide more social security and health care services. This can be done by increasing the contributions to social security and health care services, and by providing more services to older people.

Another way to address the challenge of the increase in the number of people aged 65 and over is to provide more housing and care services. This can be done by increasing the number of housing and care services, and by providing more services to older people.

Finally, it is important that governments and society as a whole provide more opportunities for older people to participate in society. This can be done by providing more opportunities for older people to work, to volunteer, and to participate in community activities.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the quality of care in the public sector. The Department of Health (1996) has set out a number of key objectives for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the financial position of the public sector. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be efficient.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the financial position of the public sector. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be efficient.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the financial position of the public sector. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1998). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 2002). The United Nations predicts that by 2050, the number of people aged 65 and over will have increased to 1.2 billion, and the number of people under 15 years of age will have decreased to 1.1 billion (United Nations, 2002).

There are a number of factors that are likely to contribute to the increase in the number of people aged 65 and over. One of the main factors is the increase in life expectancy. In 1990, the life expectancy at birth was 47 years for men and 51 years for women. By 2050, the life expectancy at birth is predicted to be 74 years for men and 79 years for women (United Nations, 2002). This increase in life expectancy is due to a number of factors, including improvements in medical care, better nutrition, and a more stable environment.

Another factor that is likely to contribute to the increase in the number of people aged 65 and over is the decrease in the number of people in the working age population. In 1990, the number of people aged 15 and over was 1.5 billion. By 2050, the number of people aged 15 and over is predicted to be 1.1 billion (United Nations, 2002). This decrease in the number of people in the working age population is due to a number of factors, including a decrease in the birth rate and a decrease in the number of people who are able to work for long periods of time.

The increase in the number of people aged 65 and over has a number of implications for society. One of the main implications is the need for more social security and health care services. As the number of people aged 65 and over increases, the number of people who are dependent on social security and health care services will also increase. This will place a greater burden on the government and on the private sector to provide these services.

Another implication of the increase in the number of people aged 65 and over is the need for more housing and care services. As the number of people aged 65 and over increases, the number of people who need housing and care services will also increase. This will place a greater burden on the government and on the private sector to provide these services.

The increase in the number of people aged 65 and over is a major challenge for society. It is important that we take steps to address this challenge in order to ensure that we can provide the services that are needed by the growing number of people aged 65 and over. This will require a combination of government action and private sector action.

One of the ways in which the government can address this challenge is by increasing the number of people who are able to work for long periods of time. This can be done by providing training and education for older people, and by creating more jobs for older people. The private sector can also play a role in addressing this challenge by providing more social security and health care services to older people.

In conclusion, the increase in the number of people aged 65 and over is a major challenge for society. It is important that we take steps to address this challenge in order to ensure that we can provide the services that are needed by the growing number of people aged 65 and over. This will require a combination of government action and private sector action.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1998) and the number of people in the public sector who are employed in the health sector has increased by 1.2 million (from 1.3 million in 1980 to 2.5 million in 1998) (Department of Health 1999).

There is a growing emphasis on the need to improve the quality of care in the public sector. This has led to a number of initiatives, including the introduction of the Health Service Act 1999, which sets out the framework for the regulation of health services, and the introduction of the Health Service Complaints Act 1999, which sets out the framework for the handling of complaints about health services.

The Health Service Act 1999 also sets out the framework for the regulation of health services. This includes the introduction of the Health Service Regulation Act 1999, which sets out the framework for the regulation of health services, and the introduction of the Health Service Complaints Act 1999, which sets out the framework for the handling of complaints about health services.

The Health Service Complaints Act 1999 sets out the framework for the handling of complaints about health services. the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly. The world population is projected to reach 6 billion by the year 2000, and to reach 8 billion by the year 2025 (UNEP 1992).

Second, the world's population is becoming more urban. In 1990, 54% of the world's population lived in urban areas. By the year 2000, this figure is projected to rise to 60% (UNEP 1992).

Third, the world's population is becoming more dependent on food imports. In 1990, the world's population imported 1.2 billion tonnes of food. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Fourth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Fifth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Sixth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Seventh, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Eighth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Ninth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Tenth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Eleventh, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Twelfth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Thirteenth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Fourteenth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).

Fifteenth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 1.2 billion tonnes of food aid. By the year 2000, this figure is projected to rise to 1.8 billion tonnes (UNEP 1992).
