the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which is not surprising given that they are both part of the same journal.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own objectives and its own way of working. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.
