The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a cousin, with 1.5 million people living with a cousin employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with an aunt or uncle, with 1.5 million people living with an aunt or uncle employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a niece or nephew, with 1.5 million people living with a niece or nephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandniece or grandnephew, with 1.5 million people living with a grandniece or grandnephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-niece or great-nephew, with 1.5 million people living with a great-niece or great-nephew employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a great-grandniece or great-grandnephew, with 1.5 million people living with a great-grandniece or great-grandnephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-great-niece or great-great-nephew, with 1.5 million people living with a great-great-niece or great-great-nephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-great-great-niece or great-great-great-nephew, with 1.5 million people living with a great-great-great-niece or great-great-great-nephew employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the lower socio-economic classes, with 1.5 million people from the lower socio-economic classes employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a cousin, with 1.5 million people living with a cousin employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with an aunt or uncle, with 1.5 million people living with an aunt or uncle employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a niece or nephew, with 1.5 million people living with a niece or nephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandniece or grandnephew, with 1.5 million people living with a grandniece or grandnephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-niece or great-nephew, with 1.5 million people living with a great-niece or great-nephew employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a great-grandniece or great-grandnephew, with 1.5 million people living with a great-grandniece or great-grandnephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-great-niece or great-great-nephew, with 1.5 million people living with a great-great-niece or great-great-nephew employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-great-great-niece or great-great-great-nephew, with 1.5 million people living with a great-great-great-niece or great-great-great-nephew employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK with a mental health problem has increased by 50% (Mental Health Act 1983, 1993). The prevalence of mental health problems has increased in the UK, and this has led to a corresponding increase in the number of people with mental health problems who are in contact with the criminal justice system. The number of people with mental health problems who are in contact with the criminal justice system has increased by 50% in the last 10 years (Mental Health Act 1983, 1993).

The increase in the number of people with mental health problems who are in contact with the criminal justice system has led to a corresponding increase in the number of people with mental health problems who are in contact with the criminal justice system. The number of people with mental health problems who are in contact with the criminal justice system has increased by 50% in the last 10 years (Mental Health Act 1983, 1993).

The increase in the number of people with mental health problems who are in contact with the criminal justice system has led to a corresponding increase in the number of people with mental health problems who are in contact with the criminal justice system. The number of people with mental health problems who are in contact with the criminal justice system has increased by 50% in the last 10 years (Mental Health Act 1983, 1993).

The increase in the number of people with mental health problems who are in contact with the criminal justice system has led to a corresponding increase in the number of people with mental health problems who are in contact with the criminal justice system. The number of people with mental health problems who are in contact with the criminal justice system has increased by 50% in the last 10 years (Mental Health Act 1983, 1993).

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly. The world population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992). Second, the world's population is becoming more urbanized. The world's population is projected to increase from 55% urban in 1990 to 65% urban in 2020 (UNEP 1992).

Third, the world's population is becoming more dependent on food imports. The world's population is projected to increase from 10% dependent on food imports in 1990 to 20% dependent on food imports in 2020 (UNEP 1992). Fourth, the world's population is becoming more dependent on food aid. The world's population is projected to increase from 10% dependent on food aid in 1990 to 20% dependent on food aid in 2020 (UNEP 1992).

There are a number of reasons why the world's population is becoming more dependent on food imports and food aid. First, the world's population is becoming more dependent on food imports because of the increasing demand for food. The world's population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992).

Second, the world's population is becoming more dependent on food imports because of the increasing demand for food. The world's population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992). Third, the world's population is becoming more dependent on food imports because of the increasing demand for food. The world's population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992).

There are a number of reasons why the world's population is becoming more dependent on food aid. First, the world's population is becoming more dependent on food aid because of the increasing demand for food. The world's population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992).

Second, the world's population is becoming more dependent on food aid because of the increasing demand for food. The world's population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992). Third, the world's population is becoming more dependent on food aid because of the increasing demand for food. The world's population is projected to increase from 5.5 billion in 1990 to 7.5 billion in 2020 (UNEP 1992).

There are a number of reasons why the world's population is becoming more dependent on food aid. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000). The increase in the number of people aged 65 and over is expected to be due to a combination of factors, including a decline in the birth rate, a decline in the death rate, and a decline in the rate of emigration.

The increase in the number of people aged 65 and over is expected to have a significant impact on the UK's economy and society. The increase in the number of people aged 65 and over is expected to lead to a decline in the number of people in the workforce, which will lead to a decline in the number of people who are able to pay taxes. This will lead to a decline in the amount of money that is available to fund public services, which will lead to a decline in the quality of public services. The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to support themselves, which will lead to a decline in the number of people who are able to pay for their own care and support.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to work, which will lead to a decline in the number of people who are able to pay taxes. This will lead to a decline in the amount of money that is available to fund public services, which will lead to a decline in the quality of public services. The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to support themselves, which will lead to a decline in the number of people who are able to pay for their own care and support.

The increase in the number of people aged 65 and over is also expected to lead to a decline in the number of people who are able to work, which will lead to a decline in the number of people who are able to pay taxes. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this has implications for the way in which it is managed and the way in which it is funded.
