the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations 1999).

There is a growing awareness that the needs of children and young people are different from those of adults, and that the needs of children and young people are different from those of older people. This has led to a growing emphasis on the need for services to be tailored to the needs of children and young people, and to the need for services to be tailored to the needs of older people.

This has led to a growing emphasis on the need for services to be tailored to the needs of children and young people, and to the need for services to be tailored to the needs of older people.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations 1999).

There is a growing awareness that the needs of children and young people are different from those of adults, and that the needs of children and young people are different from those of older people. This has led to a growing emphasis on the need for services to be tailored to the needs of children and young people, and to the need for services to be tailored to the needs of older people.

This has led to a growing emphasis on the need for services to be tailored to the needs of children and young people, and to the need for services to be tailored to the needs of older people.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion (United Nations 1999). The number of children in the world is projected to increase to 2.5 billion by the year 2025 (United Nations 1999). The United Nations (1999) also predicts that the number of children in the world will increase to 3.5 billion by the year 2050.

There are a number of factors that are likely to contribute to the increase in the number of children in the world. One of the most important factors is the increase in the life expectancy of people in the world. As people live longer, they are more likely to have children. Another factor is the increase in the number of people who are in the reproductive age group (15-49 years of age). The number of people in this age group is projected to increase from 1.2 billion in 1990 to 2.5 billion in 2025 (United Nations 1999).

The increase in the number of children in the world is a major challenge for the world's governments. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

One of the most important ways that the world's governments can meet this need is by investing in education. Education is a key factor in the development of a country, and it is essential for the well-being of its people. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

Another way that the world's governments can meet this need is by investing in health care. Health care is a key factor in the development of a country, and it is essential for the well-being of its people. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

There are a number of other factors that are likely to contribute to the increase in the number of children in the world.
