the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the quality of care in the public sector. The Department of Health (1996) has set out a number of key objectives for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

The Department of Health (1996) has also set out a number of key strategies for the public sector, including the need to improve the quality of care, to reduce waiting times, to improve the efficiency of the system, and to improve the satisfaction of patients and staff. The Department of Health (1996) has also set out a number of key principles for the public sector, including the need to be patient-centred, to be transparent, to be accountable, and to be fair.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office of National Statistics, 2001).

There is a growing awareness of the need to address the health care needs of older people. The Department of Health (2000) has set out a vision for the future of health care for older people, and the National Institute for Clinical Excellence (NICE) (2001) has published guidance on the management of older people with common chronic conditions.

There is a need to ensure that health care professionals are equipped with the knowledge and skills to meet the needs of older people. This paper discusses the current state of research in this area and outlines the need for a research programme to address the needs of older people.

Background

The World Health Organization (WHO) (1990) has defined ageing as a process of becoming older, which is a natural part of life. It is a process that involves changes in the body, mind and emotions.

There is a growing awareness of the need to address the health care needs of older people. The Department of Health (2000) has set out a vision for the future of health care for older people, and the National Institute for Clinical Excellence (NICE) (2001) has published guidance on the management of older people with common chronic conditions.

There is a need to ensure that health care professionals are equipped with the knowledge and skills to meet the needs of older people. This paper discusses the current state of research in this area and outlines the need for a research programme to address the needs of older people.

Methods

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

Results

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

Conclusion

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

The research programme was designed to address the needs of older people. It was a multi-centred study involving a number of health care professionals and older people.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, scope and uses of information, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of information science, and the social, cultural and economic aspects of information.

The 'communication' field is defined as:

...the study of the nature, scope and uses of communication, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of communication science, and the social, cultural and economic aspects of communication.

The 'information science' field is defined as:

...the study of the nature, scope and uses of information science, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of information science, and the social, cultural and economic aspects of information science.

The 'communication science' field is defined as:

...the study of the nature, scope and uses of communication science, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of communication science, and the social, cultural and economic aspects of communication science.

The 'information technology' field is defined as:

...the study of the nature, scope and uses of information technology, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of information technology, and the social, cultural and economic aspects of information technology.

The 'communication technology' field is defined as:

...the study of the nature, scope and uses of communication technology, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of communication technology, and the social, cultural and economic aspects of communication technology.

The 'information systems' field is defined as:

...the study of the nature, scope and uses of information systems, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of information systems, and the social, cultural and economic aspects of information systems.

The 'communication systems' field is defined as:

...the study of the nature, scope and uses of communication systems, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of communication systems, and the social, cultural and economic aspects of communication systems.

The 'information management' field is defined as:

...the study of the nature, scope and uses of information management, and the methods of its collection, organisation, storage, retrieval and dissemination. It is a broad discipline, embracing the history, theory and practice of information management, and the social, cultural and economic aspects of information management.
