the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own role to play. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. The most important is the rapid increase in the world's population. The world's population is now over 6 billion and is projected to reach 9 billion by the year 2050 (UN 1994).

Another reason is the increasing demand for food. As the world's population increases, the demand for food increases. This is because people need more food to eat.

A third reason is the increasing demand for land. As the world's population increases, the demand for land increases. This is because people need more land to grow food.

A fourth reason is the increasing demand for water. As the world's population increases, the demand for water increases. This is because people need more water to grow food.

A fifth reason is the increasing demand for energy. As the world's population increases, the demand for energy increases. This is because people need more energy to grow food.

A sixth reason is the increasing demand for food. As the world's population increases, the demand for food increases. This is because people need more food to eat.

A seventh reason is the increasing demand for land. As the world's population increases, the demand for land increases. This is because people need more land to grow food.

An eighth reason is the increasing demand for water. As the world's population increases, the demand for water increases. This is because people need more water to grow food.

A ninth reason is the increasing demand for energy. As the world's population increases, the demand for energy increases. This is because people need more energy to grow food.

A tenth reason is the increasing demand for food. As the world's population increases, the demand for food increases. This is because people need more food to eat.

A eleventh reason is the increasing demand for land. As the world's population increases, the demand for land increases. This is because people need more land to grow food.

A twelfth reason is the increasing demand for water. As the world's population increases, the demand for water increases. This is because people need more water to grow food.

A thirteenth reason is the increasing demand for energy. As the world's population increases, the demand for energy increases. This is because people need more energy to grow food.

A fourteenth reason is the increasing demand for food. As the world's population increases, the demand for food increases. This is because people need more food to eat.

A fifteenth reason is the increasing demand for land. As the world's population increases, the demand for land increases. This is because people need more land to grow food.

A sixteenth reason is the increasing demand for water. As the world's population increases, the demand for water increases. This is because people need more water to grow food.

A seventeenth reason is the increasing demand for energy. As the world's population increases, the demand for energy increases. This is because people need more energy to grow food.

A eighteenth reason is the increasing demand for food. As the world's population increases, the demand for food increases. This is because people need more food to eat.

A nineteenth reason is the increasing demand for land. As the world's population increases, the demand for land increases. This is because people need more land to grow food.

A twentieth reason is the increasing demand for water. As the world's population increases, the demand for water increases. This is because people need more water to grow food.

A twenty-first reason is the increasing demand for energy. As the world's population increases, the demand for energy increases. This is because people need more energy to grow food.

A twenty-second reason is the increasing demand for food. As the world's population increases, the demand for food increases. This is because people need more food to eat.

A twenty-third reason is the increasing demand for land. As the world's population increases, the demand for land increases. This is because people need more land to grow food.

A twenty-fourth reason is the increasing demand for water. As the world's population increases, the demand for water increases. This is because people need more water to grow food.

A twenty-fifth reason is the increasing demand for energy. As the world's population increases, the demand for energy increases. This is because people need more energy to grow food.
