the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to identify areas for improvement.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing emphasis on the need to improve the efficiency of the public sector. This is due to a number of factors, including the increasing pressure on public resources, the need to ensure that public services are delivered in a cost-effective manner, and the need to ensure that public services are delivered in a timely manner.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this has implications for the way in which it is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. One of the main reasons is that the world's population is growing very rapidly. In 1990, there were 5.3 billion people in the world. By 2000, there will be 6.1 billion people in the world. By 2010, there will be 6.9 billion people in the world. By 2020, there will be 7.6 billion people in the world.

Another reason why the world's population is becoming more undernourished is that the world's food production is not keeping pace with the world's population growth. In 1990, the world produced 2.1 billion tonnes of food. By 2000, the world will produce 2.4 billion tonnes of food. By 2010, the world will produce 2.7 billion tonnes of food. By 2020, the world will produce 3.0 billion tonnes of food.

A third reason why the world's population is becoming more undernourished is that the world's food is not being distributed evenly. In 1990, 1.1 billion people in the world were undernourished. By 2000, 1.4 billion people in the world were undernourished. By 2010, 1.7 billion people in the world were undernourished. By 2020, 2.0 billion people in the world were undernourished.

There are a number of ways in which the world's population can be made more food secure. One way is to increase the world's food production. Another way is to improve the world's food distribution. A third way is to reduce the world's population growth.

There are a number of ways in which the world's food production can be increased. One way is to increase the world's agricultural output. Another way is to improve the world's agricultural technology. A third way is to increase the world's agricultural land.

There are a number of ways in which the world's food distribution can be improved. One way is to increase the world's food stocks. Another way is to improve the world's food transport. A third way is to increase the world's food trade.

There are a number of ways in which the world's population growth can be reduced. One way is to increase the world's birth control. Another way is to improve the world's family planning. A third way is to increase the world's reproductive health.

There are a number of ways in which the world's population can be made more food secure. One way is to increase the world's food production. Another way is to improve the world's food distribution. A third way is to reduce the world's population growth.

There are a number of ways in which the world's food production can be increased. One way is to increase the world's agricultural output. Another way is to improve the world's agricultural technology. A third way is to increase the world's agricultural land.

There are a number of ways in which the world's food production can be increased. One way is to increase the world's agricultural output. Another way is to improve the world's agricultural technology. A third way is to increase the world's agricultural land.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. The most important is that the world's population is growing very rapidly. In 1990, the world's population was 5.3 billion. By 2000, it was 6.1 billion. By 2010, it is expected to be 6.9 billion (UN 1998).

Another reason why the world's population is becoming more undernourished is that the world's food supply is not growing fast enough to keep up with the growing population. In 1990, the world's food supply was 1.8 billion tonnes. By 2000, it was 2.1 billion tonnes. By 2010, it is expected to be 2.4 billion tonnes (FAO 1996).

A third reason why the world's population is becoming more undernourished is that the world's food is not distributed evenly. In 1990, the world's food was distributed so that 1.8 billion people had enough to eat, 1.8 billion people had less than enough to eat, and 1.8 billion people had not enough to eat (FAO 1996).

There are a number of ways in which the world's food supply can be increased. One way is to increase the amount of land that is used for growing food. Another way is to increase the amount of food that is produced on the same amount of land. A third way is to reduce the amount of food that is wasted (FAO 1996).

There are a number of ways in which the world's food can be distributed more evenly. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).

There are a number of ways in which the world's food can be made more available to the poor. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).

There are a number of ways in which the world's food can be made more affordable. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).

There are a number of ways in which the world's food can be made more nutritious. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).

There are a number of ways in which the world's food can be made more sustainable. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).

There are a number of ways in which the world's food can be made more secure. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).

There are a number of ways in which the world's food can be made more stable. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).

There are a number of ways in which the world's food can be made more resilient. One way is to increase the amount of food that is produced in the developing countries. Another way is to reduce the amount of food that is exported from the developed countries. A third way is to increase the amount of food that is imported by the developing countries (FAO 1996).
