the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.4 billion to 0.6 billion (United Nations, 2002). The United Nations predicts that by 2050, the number of people aged 65 and over will have increased to 1.1 billion, and the number of people under 15 years of age will have decreased to 1.1 billion (United Nations, 2002).

There are a number of factors that are likely to contribute to the increase in the number of people aged 65 and over. One of the main factors is the increase in life expectancy. In 1990, the life expectancy at birth was 47 years for men and 51 years for women. By 2050, the life expectancy at birth is predicted to be 74 years for men and 79 years for women (United Nations, 2002).

Another factor is the decrease in fertility. In 1990, the total fertility rate was 4.7 children per woman. By 2050, the total fertility rate is predicted to be 1.5 children per woman (United Nations, 2002). This decrease in fertility is due to a number of factors, including the increase in the age at which women have children, and the decrease in the number of children born to each woman.

The increase in the number of people aged 65 and over is a global phenomenon. In 1990, there were 0.4 billion people aged 65 and over in the world. By 2050, there are predicted to be 1.1 billion people aged 65 and over in the world (United Nations, 2002). This increase is particularly pronounced in developed countries, where the number of people aged 65 and over is predicted to increase from 0.2 billion in 1990 to 0.6 billion in 2050.

The increase in the number of people aged 65 and over has a number of implications for society. One of the main implications is the increase in the demand for social services. As the number of people aged 65 and over increases, the demand for social services such as housing, healthcare, and social security will also increase. This increase in demand will place a significant burden on governments and societies.

Another implication is the increase in the cost of healthcare. As the number of people aged 65 and over increases, the cost of healthcare will also increase. This is because older people are more likely to have chronic conditions, and therefore require more expensive medical treatments. This increase in the cost of healthcare will place a significant burden on governments and societies.

The increase in the number of people aged 65 and over is a challenge for society. However, there are a number of ways in which society can prepare for this increase. One of the main ways is to increase the age at which people retire. This will help to reduce the demand for social services, and will also help to reduce the cost of healthcare.

Another way is to increase the number of people working. This will help to increase the tax base, and will also help to reduce the demand for social services. This can be done by encouraging people to work longer hours, and by encouraging people to start working at a younger age.

The increase in the number of people aged 65 and over is a global phenomenon. It is a challenge for society, but there are a number of ways in which society can prepare for this increase. By increasing the age at which people retire, and by increasing the number of people working, society can reduce the demand for social services, and can reduce the cost of healthcare.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this has implications for the way in which it is managed and the way in which it is funded.
