?	?	?	?	?

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations, 1999).

There are a number of reasons why the world's population is ageing. The first is that the number of people who are born is falling. The number of children born in the world in 1990 was 1.4 billion, but in 1998 it was 1.2 billion (United Nations, 1999). The second reason is that people are living longer. The average life expectancy at birth in the world in 1990 was 47 years, but in 1998 it was 52 years (United Nations, 1999).

The third reason is that the number of people who are dying is falling. The number of people who died in the world in 1990 was 5.4 million, but in 1998 it was 4.4 million (United Nations, 1999). The fourth reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The fifth reason is that the number of people who are poor is falling. The number of people who were poor in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The sixth reason is that the number of people who are ill is falling. The number of people who were ill in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The seventh reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The eighth reason is that the number of people who are poor is falling. The number of people who were poor in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The ninth reason is that the number of people who are ill is falling. The number of people who were ill in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The tenth reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The eleventh reason is that the number of people who are poor is falling. The number of people who were poor in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The twelfth reason is that the number of people who are ill is falling. The number of people who were ill in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The thirteenth reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The fourteenth reason is that the number of people who are poor is falling. The number of people who were poor in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The fifteenth reason is that the number of people who are ill is falling. The number of people who were ill in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The sixteenth reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The seventeenth reason is that the number of people who are poor is falling. The number of people who were poor in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The eighteenth reason is that the number of people who are ill is falling. The number of people who were ill in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The nineteenth reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The twentieth reason is that the number of people who are poor is falling. The number of people who were poor in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The twenty-first reason is that the number of people who are ill is falling. The number of people who were ill in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The twenty-second reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The twenty-third reason is that the number of people who are poor is falling. The number of people who were poor in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999). The twenty-fourth reason is that the number of people who are ill is falling. The number of people who were ill in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).

The twenty-fifth reason is that the number of people who are disabled is falling. The number of people who were disabled in the world in 1990 was 1.1 billion, but in 1998 it was 0.9 billion (United Nations, 1999).
