the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 50% of the public sector workforce being female in 1995 (Department of Social Security 1996).

There are a number of reasons why the public sector has become an important employer of women. First, the public sector has a high proportion of female employees in a number of key areas, such as health care, education and social services. Second, the public sector has a high proportion of part-time employees, which is attractive to women who are balancing work and family commitments. Third, the public sector has a high proportion of employees who are employed on permanent contracts, which is attractive to women who are seeking long-term employment.
