the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 2001). The number of people who are obese has increased from 100 million in 1975 to 300 million in 2000 (WHO 2000).

Obesity is a complex condition, with many causes. It is a result of an imbalance between energy intake and energy expenditure. The energy intake is determined by the amount of food and drink consumed, and the energy expenditure is determined by the amount of physical activity.

Obesity is a global health problem, and it is a leading cause of death and disability. It is a risk factor for many chronic diseases, including heart disease, diabetes, and cancer. It is also a risk factor for mental health problems, such as depression and anxiety.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 1.5 million to 2.5 million (16% of the population). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse organisation, and it is difficult to define what it is. The public sector is often defined as the part of the economy that is owned and controlled by the state. This includes the government, local authorities, and public corporations. The public sector is also often defined as the part of the economy that provides public services. This includes the health service, the education system, and the social security system.

The public sector is a major employer in the UK, and it has a significant impact on the economy. The public sector is a major source of revenue for the state, and it is also a major source of employment. The public sector is a complex and diverse organisation, and it is difficult to define what it is. The public sector is often defined as the part of the economy that is owned and controlled by the state.
