the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the needs of people with mental health problems. The Department of Health (2000) has set out a vision for the future of mental health care, which includes a focus on prevention, early intervention, and recovery. This vision is reflected in the Mental Health Act 2003, which sets out the principles of care for people with mental health problems.

The purpose of this paper is to explore the experiences of people with mental health problems who are involved in the criminal justice system. We will discuss the challenges that these people face, and the need for a more holistic approach to their care.

The paper is organized as follows. First, we will discuss the prevalence of mental health problems in the criminal justice system. Second, we will explore the challenges that people with mental health problems face when they are involved in the criminal justice system. Third, we will discuss the need for a more holistic approach to their care.

Finally, we will discuss some of the ways in which the criminal justice system can better meet the needs of people with mental health problems. This paper is based on a review of the literature and on interviews with people with mental health problems who are involved in the criminal justice system.
