the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly. The world population is projected to reach 6 billion by the year 2000, and to reach 8 billion by the year 2025 (UNEP 1992).

Second, the world's population is becoming more urban. In 1990, 54% of the world's population lived in urban areas. By the year 2000, this figure is projected to rise to 60% (UNEP 1992).

Third, the world's population is becoming more dependent on food imports. In 1990, the world's population imported 10% of its food. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fourth, the world's population is becoming more dependent on food aid. In 1990, the world's population received 10% of its food from aid. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fifth, the world's population is becoming more dependent on food from developed countries. In 1990, the world's population received 10% of its food from developed countries. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Sixth, the world's population is becoming more dependent on food from the private sector. In 1990, the world's population received 10% of its food from the private sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Seventh, the world's population is becoming more dependent on food from the public sector. In 1990, the world's population received 10% of its food from the public sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Eighth, the world's population is becoming more dependent on food from the non-profit sector. In 1990, the world's population received 10% of its food from the non-profit sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Ninth, the world's population is becoming more dependent on food from the voluntary sector. In 1990, the world's population received 10% of its food from the voluntary sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Tenth, the world's population is becoming more dependent on food from the government sector. In 1990, the world's population received 10% of its food from the government sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Eleventh, the world's population is becoming more dependent on food from the international community. In 1990, the world's population received 10% of its food from the international community. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Twelfth, the world's population is becoming more dependent on food from the private sector. In 1990, the world's population received 10% of its food from the private sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Thirteenth, the world's population is becoming more dependent on food from the public sector. In 1990, the world's population received 10% of its food from the public sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fourteenth, the world's population is becoming more dependent on food from the non-profit sector. In 1990, the world's population received 10% of its food from the non-profit sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Fifteenth, the world's population is becoming more dependent on food from the voluntary sector. In 1990, the world's population received 10% of its food from the voluntary sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).

Sixteenth, the world's population is becoming more dependent on food from the government sector. In 1990, the world's population received 10% of its food from the government sector. By the year 2000, this figure is projected to rise to 20% (UNEP 1992).
