the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social security and the management of public infrastructure.

The public sector is a major source of employment in the UK, and it is also a major source of revenue for the state. The public sector is therefore a key part of the UK economy, and it is important to understand how it is managed and how it is funded.

The public sector is a complex and diverse entity, and it is difficult to define it precisely. However, it can be described as the part of the economy that is owned and controlled by the state. It includes a wide range of activities, from the provision of health care and education to the provision of social security and the management of public infrastructure.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There is a growing awareness of the need to improve the nutritional status of the world's population. The United Nations World Food Programme (WFP) has been instrumental in this regard, and has been successful in increasing the number of people who are receiving food aid from 100 million in 1980 to 150 million in 1995 (WFP 1996).

One of the main reasons for the increase in the number of people who are undernourished is the rapid population growth in the developing world. The world population is expected to reach 6 billion by the year 2000, and 8 billion by the year 2025 (UN 1994).

Another reason for the increase in the number of people who are undernourished is the rapid increase in the number of people who are living in poverty. The number of people who are living on less than \$1 a day has increased from 1 billion in 1980 to 2 billion in 1995 (WFP 1996).

There are a number of factors that contribute to the problem of undernutrition. These include poverty, lack of access to food, lack of knowledge of how to grow food, and lack of access to health care.

One of the most important factors is poverty. People who are poor are often unable to afford the food that they need to live. They may also be unable to afford the health care that they need to stay healthy.

Lack of access to food is another important factor. In many developing countries, there is a shortage of food. This is often due to a combination of factors, including poor weather, lack of access to land, and lack of access to seeds and fertilizers.

Lack of knowledge of how to grow food is also a problem. Many people in the developing world do not know how to grow food. They may not have access to the information that they need, or they may not have the skills that they need to grow food.

Lack of access to health care is another important factor. People who are poor are often unable to afford the health care that they need to stay healthy. They may also be unable to access health care services that are available in their area.

There are a number of ways in which the problem of undernutrition can be addressed. These include increasing the number of people who are receiving food aid, improving the nutritional status of the world's population, and increasing the number of people who are living in poverty.

One of the most important ways in which the problem of undernutrition can be addressed is by increasing the number of people who are receiving food aid. This can be done by increasing the number of people who are eligible for food aid, and by increasing the amount of food aid that is provided.

Another important way in which the problem of undernutrition can be addressed is by improving the nutritional status of the world's population. This can be done by increasing the number of people who are receiving food aid, and by increasing the amount of food aid that is provided.

Finally, another important way in which the problem of undernutrition can be addressed is by increasing the number of people who are living in poverty. This can be done by increasing the number of people who are eligible for food aid, and by increasing the amount of food aid that is provided.
