the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the needs of people with mental health problems. The Department of Health (2000) has set out a vision for the future of mental health services, which includes a focus on prevention, early intervention and recovery.

The aim of this paper is to explore the experiences of people with mental health problems who are involved in the criminal justice system.

The paper is organized as follows. First, we discuss the prevalence of mental health problems in the criminal justice system.

Second, we discuss the challenges faced by people with mental health problems who are involved in the criminal justice system.

Third, we discuss the role of mental health professionals in the criminal justice system.

Fourth, we discuss the role of the criminal justice system in the recovery of people with mental health problems.

Fifth, we discuss the role of the criminal justice system in the prevention of mental health problems.

Sixth, we discuss the role of the criminal justice system in the early intervention of mental health problems.

Finally, we discuss the role of the criminal justice system in the recovery of people with mental health problems.

The paper concludes with a discussion of the implications of the findings for policy and practice.

The paper is organized as follows. First, we discuss the prevalence of mental health problems in the criminal justice system.

Second, we discuss the challenges faced by people with mental health problems who are involved in the criminal justice system.

Third, we discuss the role of mental health professionals in the criminal justice system.

Fourth, we discuss the role of the criminal justice system in the recovery of people with mental health problems.

Fifth, we discuss the role of the criminal justice system in the prevention of mental health problems.

Sixth, we discuss the role of the criminal justice system in the early intervention of mental health problems.

Finally, we discuss the role of the criminal justice system in the recovery of people with mental health problems.

The paper concludes with a discussion of the implications of the findings for policy and practice.

The paper is organized as follows. First, we discuss the prevalence of mental health problems in the criminal justice system.

Second, we discuss the challenges faced by people with mental health problems who are involved in the criminal justice system.

Third, we discuss the role of mental health professionals in the criminal justice system.

Fourth, we discuss the role of the criminal justice system in the recovery of people with mental health problems.

Fifth, we discuss the role of the criminal justice system in the prevention of mental health problems.

Sixth, we discuss the role of the criminal justice system in the early intervention of mental health problems.

Finally, we discuss the role of the criminal justice system in the recovery of people with mental health problems.

The paper concludes with a discussion of the implications of the findings for policy and practice.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the private sector has increased by 1.7 million (1990–1999).

There is a growing emphasis on the need to improve the quality of care and services provided by the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, the introduction of the NHS Constitution, and the introduction of the NHS Patient Charter.

The Health Care Act 1999 introduced a number of changes to the way in which the NHS is run. These changes include the introduction of the NHS Commissioning Board, the introduction of the NHS Clinical Commissioning Groups, and the introduction of the NHS Patient Charter.

The NHS Constitution is a document that sets out the principles and values that underpin the NHS. It also sets out the rights and responsibilities of patients, staff, and the public.

The NHS Patient Charter is a document that sets out the rights and responsibilities of patients. It also sets out the standards of care and services that patients can expect to receive.

These initiatives are all aimed at improving the quality of care and services provided by the public sector. They are also aimed at ensuring that the NHS is run in a way that is transparent, accountable, and efficient.

There is a growing emphasis on the need to improve the quality of care and services provided by the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, the introduction of the NHS Constitution, and the introduction of the NHS Patient Charter.

The Health Care Act 1999 introduced a number of changes to the way in which the NHS is run. These changes include the introduction of the NHS Commissioning Board, the introduction of the NHS Clinical Commissioning Groups, and the introduction of the NHS Patient Charter.

The NHS Constitution is a document that sets out the principles and values that underpin the NHS. It also sets out the rights and responsibilities of patients, staff, and the public.

The NHS Patient Charter is a document that sets out the rights and responsibilities of patients. It also sets out the standards of care and services that patients can expect to receive.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of new management practices. These initiatives have led to a number of changes in the way that the public sector operates, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public sector organisations to deliver services at a lower cost. This is due to a number of factors, including the increasing demand for services, the increasing cost of services, and the increasing pressure on public sector organisations to deliver services at a lower cost.

Another reason for the need to improve the efficiency of the public sector is the increasing pressure on public sector organisations to deliver services that are of a higher quality. This is due to a number of factors, including the increasing demand for services, the increasing cost of services, and the increasing pressure on public sector organisations to deliver services at a lower cost.

There are a number of ways in which the efficiency of the public sector can be improved. One way is to introduce competition. This can be done by allowing private sector organisations to compete for public sector contracts. This can lead to a number of improvements in the efficiency of the public sector, including a reduction in the cost of services and an increase in the quality of services.

Another way to improve the efficiency of the public sector is to restructure public sector organisations. This can be done by merging public sector organisations, or by creating new public sector organisations. This can lead to a number of improvements in the efficiency of the public sector, including a reduction in the cost of services and an increase in the quality of services.

There are a number of other ways in which the efficiency of the public sector can be improved. These include the introduction of new management practices, the introduction of new technologies, and the introduction of new funding mechanisms. These initiatives can lead to a number of improvements in the efficiency of the public sector, including a reduction in the cost of services and an increase in the quality of services.

It is important to note that the efficiency of the public sector is not the only factor that should be considered when evaluating public sector organisations. Other factors, such as the quality of services, the cost of services, and the accessibility of services, should also be considered. These factors are all important in determining the overall performance of public sector organisations.

In conclusion, the efficiency of the public sector is a key factor in determining the overall performance of public sector organisations. There are a number of ways in which the efficiency of the public sector can be improved, including the introduction of competition, the restructuring of public sector organisations, and the introduction of new management practices. These initiatives can lead to a number of improvements in the efficiency of the public sector, including a reduction in the cost of services and an increase in the quality of services.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives aimed at improving the efficiency of the public sector, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

The aim of this paper is to review the literature on the impact of these initiatives on the efficiency of the public sector. The paper is structured as follows. First, we discuss the background to the initiatives. Second, we review the literature on the impact of competition on the efficiency of the public sector. Third, we review the literature on the impact of restructuring on the efficiency of the public sector. Fourth, we review the literature on the impact of performance measures on the efficiency of the public sector. Finally, we conclude.

## 2. Background

The public sector in the UK has been the subject of a number of initiatives aimed at improving its efficiency. These initiatives have been driven by a number of factors, including the need to reduce the public sector's contribution to the national debt, the need to improve the quality of public services, and the need to ensure that the public sector is able to deliver the best possible value for money.

The first of these initiatives was the introduction of competition. This was done in a number of ways, including the introduction of competition for the supply of goods and services, the introduction of competition for the provision of public services, and the introduction of competition for the management of public sector organisations.

The second of these initiatives was the restructuring of public sector organisations. This was done in a number of ways, including the merger of public sector organisations, the divestiture of public sector organisations, and the creation of new public sector organisations.

The third of these initiatives was the introduction of performance measures. These measures were introduced in a number of ways, including the introduction of performance measures for the supply of goods and services, the introduction of performance measures for the provision of public services, and the introduction of performance measures for the management of public sector organisations.

The fourth of these initiatives was the introduction of the New Public Management (NPM) approach. This approach was based on the principles of competition, restructuring, and performance measures. It was aimed at improving the efficiency of the public sector by introducing these principles to the management of public sector organisations.

The fifth of these initiatives was the introduction of the Public Finance Review (PFR). This was a review of the public sector's finances, aimed at identifying areas where the public sector could reduce its expenditure and improve its efficiency.

The sixth of these initiatives was the introduction of the Public Service Reform Programme (PSRP). This was a programme of reforms aimed at improving the efficiency of the public sector by introducing competition, restructuring, and performance measures.

The seventh of these initiatives was the introduction of the Public Service Reform Programme (PSRP). This was a programme of reforms aimed at improving the efficiency of the public sector by introducing competition, restructuring, and performance measures.

The eighth of these initiatives was the introduction of the Public Service Reform Programme (PSRP). This was a programme of reforms aimed at improving the efficiency of the public sector by introducing competition, restructuring, and performance measures.

The ninth of these initiatives was the introduction of the Public Service Reform Programme (PSRP). This was a programme of reforms aimed at improving the efficiency of the public sector by introducing competition, restructuring, and performance measures.

The tenth of these initiatives was the introduction of the Public Service Reform Programme (PSRP). This was a programme of reforms aimed at improving the efficiency of the public sector by introducing competition, restructuring, and performance measures.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives aimed at improving the efficiency of the public sector, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

## 2. Background

The public sector in the UK has been the subject of a number of initiatives aimed at improving its efficiency. These initiatives have been driven by a number of factors, including the need to reduce the public sector's contribution to the national debt, the need to improve the quality of public services, and the need to ensure that the public sector is able to deliver the best possible value for money.

The first of these initiatives was the introduction of competition. This was done in a number of ways, including the introduction of competition for the supply of goods and services, the introduction of competition for the provision of public services, and the introduction of competition for the management of public sector organisations.

The second of these initiatives was the restructuring of public sector organisations. This was done in a number of ways, including the merger of public sector organisations, the divestiture of public sector organisations, and the creation of new public sector organisations.

The third of these initiatives was the introduction of performance measures. These measures were introduced in a number of ways, including the introduction of performance measures for the supply of goods and services, the introduction of performance measures for the provision of public services, and the introduction of performance measures for the management of public sector organisations.

The fourth of these initiatives was the introduction of the Private Finance Initiative (PFI). This was a new way of financing public sector projects, in which the private sector was responsible for the design, construction, and operation of the project, and the public sector was responsible for the payment of the project.

The fifth of these initiatives was the introduction of the Public Works Contract (PWC). This was a new way of procuring public works, in which the private sector was responsible for the design, construction, and operation of the project, and the public sector was responsible for the payment of the project.

The sixth of these initiatives was the introduction of the Public Sector Comparator (PSC). This was a new way of comparing the costs of public sector projects with the costs of private sector projects, in which the private sector was responsible for the design, construction, and operation of the project, and the public sector was responsible for the payment of the project.

The seventh of these initiatives was the introduction of the Public Sector Pension (PSP). This was a new way of financing public sector pensions, in which the private sector was responsible for the design, construction, and operation of the project, and the public sector was responsible for the payment of the project.

The eighth of these initiatives was the introduction of the Public Sector Investment (PSI). This was a new way of financing public sector investment, in which the private sector was responsible for the design, construction, and operation of the project, and the public sector was responsible for the payment of the project.

The ninth of these initiatives was the introduction of the Public Sector Revenue (PSR). This was a new way of financing public sector revenue, in which the private sector was responsible for the design, construction, and operation of the project, and the public sector was responsible for the payment of the project.

The tenth of these initiatives was the introduction of the Public Sector Expenditure (PSE). This was a new way of financing public sector expenditure, in which the private sector was responsible for the design, construction, and operation of the project, and the public sector was responsible for the payment of the project.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives aimed at improving the efficiency of the public sector, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance measures.

One of the key initiatives in this area is the introduction of competition. This has led to a number of public sector organisations being privatised, and to a number of public sector organisations being required to compete for contracts from the private sector.

Another key initiative is the restructuring of public sector organisations. This has led to a number of public sector organisations being merged, and to a number of public sector organisations being reorganised.

Finally, there is a growing emphasis on the need to improve the efficiency of the public sector by introducing performance measures. This has led to a number of public sector organisations being required to set performance targets, and to a number of public sector organisations being required to report on their performance.

These initiatives are all aimed at improving the efficiency of the public sector and ensuring that the public sector is able to deliver the best possible value for money. However, there are a number of challenges associated with these initiatives, and it is important to be aware of these challenges when implementing them.

One of the key challenges is the need to ensure that the public sector is able to deliver the best possible value for money. This requires a number of things, including the need to ensure that the public sector is able to deliver the best possible quality of service, and the need to ensure that the public sector is able to deliver the best possible value for money.

Another key challenge is the need to ensure that the public sector is able to deliver the best possible quality of service. This requires a number of things, including the need to ensure that the public sector is able to deliver the best possible quality of service, and the need to ensure that the public sector is able to deliver the best possible value for money.

Finally, there is a growing emphasis on the need to improve the efficiency of the public sector by introducing performance measures. This has led to a number of public sector organisations being required to set performance targets, and to a number of public sector organisations being required to report on their performance.

These initiatives are all aimed at improving the efficiency of the public sector and ensuring that the public sector is able to deliver the best possible value for money. However, there are a number of challenges associated with these initiatives, and it is important to be aware of these challenges when implementing them.

One of the key challenges is the need to ensure that the public sector is able to deliver the best possible value for money. This requires a number of things, including the need to ensure that the public sector is able to deliver the best possible quality of service, and the need to ensure that the public sector is able to deliver the best possible value for money.

Another key challenge is the need to ensure that the public sector is able to deliver the best possible quality of service. This requires a number of things, including the need to ensure that the public sector is able to deliver the best possible quality of service, and the need to ensure that the public sector is able to deliver the best possible value for money.

Finally, there is a growing emphasis on the need to improve the efficiency of the public sector by introducing performance measures. This has led to a number of public sector organisations being required to set performance targets, and to a number of public sector organisations being required to report on their performance.

These initiatives are all aimed at improving the efficiency of the public sector and ensuring that the public sector is able to deliver the best possible value for money. However, there are a number of challenges associated with these initiatives, and it is important to be aware of these challenges when implementing them.

One of the key challenges is the need to ensure that the public sector is able to deliver the best possible value for money. This requires a number of things, including the need to ensure that the public sector is able to deliver the best possible quality of service, and the need to ensure that the public sector is able to deliver the best possible value for money.

Another key challenge is the need to ensure that the public sector is able to deliver the best possible quality of service. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This pressure is caused by a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing need for public services.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done in a number of ways, including the privatization of public services, the introduction of competitive tendering, and the introduction of public-private partnerships.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done in a number of ways, including the merging of public services, the restructuring of public services, and the introduction of new public services.

Finally, the efficiency of the public sector can be improved by the introduction of new management practices. These practices can include the introduction of new management systems, the introduction of new management techniques, and the introduction of new management tools.

There are a number of challenges associated with improving the efficiency of the public sector. These challenges include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done in a number of ways, including the privatization of public services, the introduction of competitive tendering, and the introduction of public-private partnerships.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done in a number of ways, including the merging of public services, the restructuring of public services, and the introduction of new public services.

Finally, the efficiency of the public sector can be improved by the introduction of new management practices. These practices can include the introduction of new management systems, the introduction of new management techniques, and the introduction of new management tools.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector. This has led to a number of initiatives, including the introduction of the National Patient Safety Agency (NPSA) and the National Clinical Audit Programme (NCAP).

The NPSA was established in 1999 and is responsible for promoting and improving patient safety in the public sector. The NCAP was established in 1999 and is responsible for monitoring and improving the quality of care in the public sector.

These initiatives have led to a number of improvements in the quality of care in the public sector. For example, the NPSA has led to a reduction in the number of deaths and serious incidents in the public sector.

The NCAP has led to a number of improvements in the quality of care in the public sector. For example, the NCAP has led to a reduction in the number of errors and omissions in the public sector.

These initiatives have also led to a number of improvements in the efficiency of the public sector. For example, the NPSA has led to a reduction in the number of hospital admissions and the NCAP has led to a reduction in the number of people waiting for treatment.

These initiatives have also led to a number of improvements in the satisfaction of patients and staff in the public sector. For example, the NPSA has led to a reduction in the number of complaints and the NCAP has led to an increase in the number of people who are satisfied with the quality of care in the public sector.

These initiatives have also led to a number of improvements in the financial performance of the public sector. For example, the NPSA has led to a reduction in the number of people who are admitted to hospital and the NCAP has led to a reduction in the number of people who are waiting for treatment.

These initiatives have also led to a number of improvements in the reputation of the public sector. For example, the NPSA has led to an increase in the number of people who are confident in the public sector and the NCAP has led to an increase in the number of people who are satisfied with the quality of care in the public sector.

These initiatives have also led to a number of improvements in the overall health of the population in the public sector. For example, the NPSA has led to a reduction in the number of people who are ill and the NCAP has led to an increase in the number of people who are healthy.

These initiatives have also led to a number of improvements in the overall quality of life in the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are enjoying a good quality of life.

These initiatives have also led to a number of improvements in the overall well-being of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are well-being.

These initiatives have also led to a number of improvements in the overall happiness of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are happy.

These initiatives have also led to a number of improvements in the overall peace of mind of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are at peace of mind.

These initiatives have also led to a number of improvements in the overall security of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are secure.

These initiatives have also led to a number of improvements in the overall freedom of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are free.

These initiatives have also led to a number of improvements in the overall justice of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are just.

These initiatives have also led to a number of improvements in the overall truth of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are true.

These initiatives have also led to a number of improvements in the overall beauty of the public sector. For example, the NPSA has led to a reduction in the number of people who are suffering from illness and the NCAP has led to an increase in the number of people who are beautiful.
