the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' for the care of the ageing population, one that is based on a 'continuum of care' rather than a 'dual system' of care. The 'new paradigm' is based on the principle that care should be tailored to the needs of the individual, rather than being based on a 'one size fits all' approach. The 'new paradigm' is based on the principle that care should be tailored to the needs of the individual, rather than being based on a 'one size fits all' approach.
