the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has also become an important employer of people with disabilities. In 1999, 1.5 million people with disabilities were employed in the public sector, compared with 1.2 million in 1980 (Department of Health 2000).

There are a number of reasons why the public sector has become an important employer of people with disabilities. First, the public sector has a long history of employing people with disabilities. In the 19th century, the public sector was the main employer of people with disabilities. In the 20th century, the public sector continued to be an important employer of people with disabilities. In the 21st century, the public sector has become an even more important employer of people with disabilities.

Second, the public sector has a number of advantages over the private sector when it comes to employing people with disabilities. For example, the public sector is often more willing to pay higher wages to people with disabilities. The public sector is also often more willing to provide training and support to people with disabilities. Finally, the public sector is often more willing to hire people with disabilities than the private sector.

Third, the public sector has a number of disadvantages over the private sector when it comes to employing people with disabilities. For example, the public sector is often more bureaucratic than the private sector. The public sector is also often more expensive than the private sector. Finally, the public sector is often less flexible than the private sector.

Despite these advantages and disadvantages, the public sector remains an important employer of people with disabilities. In the future, it is likely that the public sector will continue to be an important employer of people with disabilities. This is because the public sector has a number of advantages over the private sector when it comes to employing people with disabilities.

One of the main reasons why the public sector is an important employer of people with disabilities is that it has a long history of employing people with disabilities. In the 19th century, the public sector was the main employer of people with disabilities. In the 20th century, the public sector continued to be an important employer of people with disabilities. In the 21st century, the public sector has become an even more important employer of people with disabilities.

Another reason why the public sector is an important employer of people with disabilities is that it has a number of advantages over the private sector when it comes to employing people with disabilities. For example, the public sector is often more willing to pay higher wages to people with disabilities. The public sector is also often more willing to provide training and support to people with disabilities. Finally, the public sector is often more willing to hire people with disabilities than the private sector.

Despite these advantages and disadvantages, the public sector remains an important employer of people with disabilities. In the future, it is likely that the public sector will continue to be an important employer of people with disabilities. This is because the public sector has a number of advantages over the private sector when it comes to employing people with disabilities.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980.
