liga feature (cannot find base glyph) (cannot find base glyph)

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) and the number of people in the public sector who are employed in health care has increased by 1.2 million (from 1.2 million in 1980 to 2.4 million in 1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of health care and to ensure that the health care system is able to meet the needs of the population. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, which sets out the framework for the regulation of health care. The Act requires health care providers to ensure that they meet certain standards of quality and safety, and to be subject to external regulation.

The Health Care Act 1999 also introduced the concept of 'clinical governance', which is a system of accountability for the quality of health care. Clinical governance is a system of accountability for the quality of health care, which is based on the principle of 'continuous improvement'. It requires health care providers to monitor and evaluate the quality of their services, and to take action to improve them where necessary.

The Health Care Act 1999 also introduced the concept of 'patient safety', which is a system of accountability for the safety of patients. Patient safety is a system of accountability for the safety of patients, which is based on the principle of 'prevention'. It requires health care providers to take steps to prevent harm to patients, and to respond to any incidents that do occur.

The Health Care Act 1999 also introduced the concept of 'clinical excellence', which is a system of accountability for the excellence of health care. Clinical excellence is a system of accountability for the excellence of health care, which is based on the principle of 'excellence'. It requires health care providers to strive for excellence in all aspects of their services, and to be subject to external regulation.

The Health Care Act 1999 also introduced the concept of 'clinical research', which is a system of accountability for the research in health care. Clinical research is a system of accountability for the research in health care, which is based on the principle of 'research'. It requires health care providers to engage in research, and to be subject to external regulation.

The Health Care Act 1999 also introduced the concept of 'clinical education', which is a system of accountability for the education in health care. Clinical education is a system of accountability for the education in health care, which is based on the principle of 'education'. It requires health care providers to provide education, and to be subject to external regulation.

The Health Care Act 1999 also introduced the concept of 'clinical practice', which is a system of accountability for the practice in health care. Clinical practice is a system of accountability for the practice in health care, which is based on the principle of 'practice'. It requires health care providers to engage in practice, and to be subject to external regulation.

The Health Care Act 1999 also introduced the concept of 'clinical governance', which is a system of accountability for the governance in health care. Clinical governance is a system of accountability for the governance in health care, which is based on the principle of 'governance'. It requires health care providers to engage in governance, and to be subject to external regulation.
