Ending "narrow" ≠ OT Feature (cannot display this character)

Cannot display because feature tag is missing in name.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.5 billion (United Nations 1999). The number of children in the world who are under 5 years of age has increased by 1 billion in the same period. The number of children in the world who are under 15 years of age is now 2.5 billion (United Nations 1999).

There is a growing concern that the rapid increase in the number of children in the world is leading to a decline in the quality of life for children. This is because the rapid increase in the number of children is leading to a decline in the resources available for each child. This is particularly true in developing countries, where the resources available for each child are already limited. This is a major concern for the world's leaders, who are trying to find ways to improve the quality of life for children in the world.

One of the ways to improve the quality of life for children is to improve the quality of the environment. This is because a clean and healthy environment is essential for the well-being of children. This is particularly true in developing countries, where the environment is often polluted and the quality of the air and water is poor. This is a major concern for the world's leaders, who are trying to find ways to improve the quality of the environment for children in the world.

Another way to improve the quality of life for children is to improve the quality of the education system. This is because a good education is essential for the well-being of children. This is particularly true in developing countries, where the education system is often poor and the quality of the teaching and learning is low. This is a major concern for the world's leaders, who are trying to find ways to improve the quality of the education system for children in the world.

There are many other ways to improve the quality of life for children, but these are the three most important. The world's leaders must work together to find ways to improve the quality of life for children in the world. This is a major challenge, but it is one that must be met if we are to ensure a better future for all children in the world.
