The first of these is the fact that the world is not a uniform whole, but a collection of many different parts, each with its own characteristics and interests. This is the principle of diversity, which is the foundation of all life and progress. Without diversity, there would be no room for growth or change, and the world would be a stagnant, lifeless mass.

The second principle is that of balance. Just as a body must be in balance to function properly, so must a society or a nation. If one part becomes too dominant, it will disrupt the harmony of the whole, leading to conflict and chaos. Balance is not a static state, but a dynamic equilibrium that allows for growth and adaptation.

The third principle is that of justice. A society that is not just is not a society at all. Justice is the cornerstone of all human relationships, and it is the duty of every individual to ensure that justice is upheld. Without justice, there is no trust, no cooperation, and no progress.

The fourth principle is that of unity. While we must recognize and respect our differences, we must also seek to find common ground and work together for the good of all. Unity is not the suppression of individuality, but the harmonious blending of diverse elements into a single, cohesive whole.

These four principles—diversity, balance, justice, and unity—are the guiding lights of a good life and a good society. They are the principles that have allowed humanity to flourish and progress, and they are the principles that we must strive to uphold in our own time.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to address the needs of children in the 1990s. The United Nations Children's Fund (UNICEF) has been instrumental in this regard, and has produced a series of reports on the state of the world's children (UNICEF 1990, 1991, 1992, 1993, 1994). These reports have highlighted the need for a new approach to children's rights, one that is based on the principle of the best interests of the child.

The United Nations Convention on the Rights of the Child (UNCRC) is a landmark document in this regard. It was adopted by the United Nations General Assembly in 1989, and is the first time in history that a treaty has been signed by more than 100 countries. The UNCRC sets out the rights of children, and provides a framework for the development of national laws and policies to protect and promote these rights.

The UNCRC is a comprehensive document, covering a wide range of issues. It includes provisions on the right to life, the right to a name and nationality, the right to a family, the right to education, the right to health, and the right to protection from abuse and exploitation. It also includes provisions on the right to participate in decisions that affect them, and the right to be heard in legal proceedings.

The UNCRC is a landmark document, and its adoption is a significant step towards the realization of children's rights. It provides a framework for the development of national laws and policies to protect and promote these rights, and it sets out the obligations of governments to do so.

The UNCRC is a comprehensive document, covering a wide range of issues. the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which communication is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)

The 'information science' field is defined as:

...the study of the nature, uses and functions of information science, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information science is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)

The 'information studies' field is defined as:

...the study of the nature, uses and functions of information studies, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information studies is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)

The 'information technology' field is defined as:

...the study of the nature, uses and functions of information technology, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information technology is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)

The 'information systems' field is defined as:

...the study of the nature, uses and functions of information systems, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information systems is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)

The 'information management' field is defined as:

...the study of the nature, uses and functions of information management, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information management is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)

The 'information policy' field is defined as:

...the study of the nature, uses and functions of information policy, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information policy is organised, stored, retrieved and disseminated in the various forms and media, and the ways in which these processes are influenced by social, cultural, economic, legal, political and technological contexts. (p. 1)
