the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2026, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing emphasis on the need to improve the efficiency of the public sector. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

This is due to a number of factors, including the increasing pressure on public resources, the need to ensure that public services are delivered in a cost-effective manner, and the need to ensure that public services are delivered in a timely manner.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing emphasis on the need to improve the efficiency of the public sector. This is due to a number of factors, including the increasing pressure on public resources, the need to ensure that public services are delivered in a cost-effective manner, and the need to ensure that public services are delivered in a timely manner.
