the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health care needs of older people, and a number of initiatives have been launched to address this need. The Department of Health has launched the 'Ageing Well' initiative, which aims to improve the health and well-being of older people. The initiative includes a number of measures, such as increasing the number of health care professionals who specialise in the care of older people, and improving the training of health care professionals in the care of older people. The initiative also includes measures to improve the access of older people to health care services, and to improve the quality of care provided to older people.

The 'Ageing Well' initiative is a key part of the government's strategy for addressing the health care needs of older people. It is a multi-agency initiative, involving the Department of Health, the Department of Social Security, and a number of other government departments. The initiative is also a partnership initiative, involving a number of non-governmental organisations and the private sector.
