the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded. The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded. The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded. The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded. The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded. The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded. The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded. The public sector is a major employer in the UK, and this has implications for the way in which the public sector is managed and for the way in which the public sector is funded.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996). The number of people who are malnourished has increased from 1.1 billion to 1.5 billion (FAO 1996).

There are a number of reasons why the number of people who are undernourished has increased. One of the main reasons is that the world population has increased. The world population is now over 6 billion and is expected to reach 9 billion by the year 2050 (FAO 1996).

Another reason why the number of people who are undernourished has increased is that the world's food supply is not keeping pace with the world's population. The world's food supply is estimated to be 1.5 billion tonnes per year, which is not enough to feed the world's population of 6 billion people (FAO 1996).

A third reason why the number of people who are undernourished has increased is that the world's food supply is not distributed evenly. Some countries have a surplus of food, while others have a shortage. This is because of differences in the world's food production and distribution (FAO 1996).

There are a number of ways in which the world's food supply can be increased. One way is to increase the world's food production. This can be done by increasing the area of land used for food production, by increasing the yield of food crops, and by increasing the number of people who are involved in food production (FAO 1996).

Another way in which the world's food supply can be increased is by improving the world's food distribution. This can be done by reducing the world's food waste, by improving the world's food storage and transport, and by improving the world's food marketing (FAO 1996).

There are a number of ways in which the world's food supply can be made more equitable. This can be done by increasing the world's food production in the developing countries, by improving the world's food distribution in the developing countries, and by improving the world's food marketing in the developing countries (FAO 1996).

There are a number of ways in which the world's food supply can be made more sustainable. This can be done by increasing the world's food production in a sustainable way, by improving the world's food distribution in a sustainable way, and by improving the world's food marketing in a sustainable way (FAO 1996).

There are a number of ways in which the world's food supply can be made more secure. This can be done by increasing the world's food production in a secure way, by improving the world's food distribution in a secure way, and by improving the world's food marketing in a secure way (FAO 1996).

There are a number of ways in which the world's food supply can be made more resilient. This can be done by increasing the world's food production in a resilient way, by improving the world's food distribution in a resilient way, and by improving the world's food marketing in a resilient way (FAO 1996).

There are a number of ways in which the world's food supply can be made more equitable, sustainable, secure, and resilient. This can be done by increasing the world's food production in a equitable, sustainable, secure, and resilient way, by improving the world's food distribution in a equitable, sustainable, secure, and resilient way, and by improving the world's food marketing in a equitable, sustainable, secure, and resilient way (FAO 1996).

There are a number of ways in which the world's food supply can be made more equitable, sustainable, secure, and resilient. This can be done by increasing the world's food production in a equitable, sustainable, secure, and resilient way, by improving the world's food distribution in a equitable, sustainable, secure, and resilient way, and by improving the world's food marketing in a equitable, sustainable, secure, and resilient way (FAO 1996).

the 1990s, the number of people in the United States who are obese has increased by 100% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 22% in 1998 (Health Survey for England 2000). In the United States, the prevalence of obesity has increased from 15% in 1980 to 30% in 1998 (Flegal et al. 2002).

Obesity is a complex condition, and its aetiology is multifactorial. It is a result of an imbalance between energy intake and energy expenditure. The energy intake is determined by the amount of food and drink consumed, and the energy expenditure is determined by the amount of physical activity. The imbalance between energy intake and energy expenditure is the result of a combination of genetic, environmental, and behavioural factors.

Obesity is a major public health problem, and it is associated with a number of health problems, including type 2 diabetes, heart disease, and stroke. It is also associated with a number of psychological problems, including depression and anxiety. Obesity is a complex condition, and its aetiology is multifactorial. It is a result of an imbalance between energy intake and energy expenditure.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.
