the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information policy' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information law' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information ethics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information economics' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information sociology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are very broad and cover a wide range of topics. However, they do provide a useful starting point for discussing the relationship between information and communication.

In the following sections, we will discuss the relationship between information and communication in more detail. We will also discuss the role of information science in this relationship.

Information science is a discipline that studies the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. It is a multidisciplinary field that draws on a wide range of disciplines, including:

- library science
- communication studies
- sociology
- psychology
- philosophy
- linguistics
- computer science
- mathematics
- statistics
- economics
- law
- medicine
- education
- business
- engineering
- agriculture
- health
- environment
- energy
- transportation
- infrastructure
- urban planning
- architecture
- design
- art
- culture
- history
- geography
- anthropology
- archaeology
- paleontology
- biology
- chemistry
- physics
- astronomy
- earth science
- environmental science
- climate science
- oceanography
- atmospheric science
- geology
- meteorology
- hydrology
- soil science
- botany
- zoology
- ecology
- conservation
- natural resource management
- environmental management
- urban management
- infrastructure management
- transportation management
- energy management
- water management
- waste management
- land use planning
- urban planning
- architecture
- design
- art
- culture
- history
- geography
- anthropology
- archaeology
- paleontology
- biology
- chemistry
- physics
- astronomy
- earth science
- environmental science
- climate science
- oceanography
- atmospheric science
- geology
- meteorology
- hydrology
- soil science
- botany
- zoology
- ecology
- conservation
- natural resource management
- environmental management
- urban management
- infrastructure management
- transportation management
- energy management
- water management
- waste management
- land use planning

Information science is a multidisciplinary field that draws on a wide range of disciplines, including:

- library science
- communication studies
- sociology
- psychology
- philosophy
- linguistics
- computer science
- mathematics
- statistics
- economics
- law
- medicine
- education
- business
- engineering
- agriculture
- health

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which communication is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'information science' field is defined as:

...the study of the nature, uses and functions of information science, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information science is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'information studies' field is defined as:

...the study of the nature, uses and functions of information studies, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information studies is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'information technology' field is defined as:

...the study of the nature, uses and functions of information technology, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information technology is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'information systems' field is defined as:

...the study of the nature, uses and functions of information systems, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information systems is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'information management' field is defined as:

...the study of the nature, uses and functions of information management, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information management is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'information policy' field is defined as:

...the study of the nature, uses and functions of information policy, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information policy is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)

The 'information law' field is defined as:

...the study of the nature, uses and functions of information law, and the ways in which it is created, communicated, evaluated and used; and the study of the ways in which information law is organised, stored, retrieved and disseminated in the context of human activities. (p. 1)
