the 1990s, the number of people in the United States who are obese has increased by 100% (Flegal et al. 2002). In the United Kingdom, the prevalence of obesity has increased from 10% in 1980 to 16% in 1997 (Health Survey for England 1997). In the United States, the prevalence of obesity has increased from 15% in 1980 to 23% in 1994 (Flegal et al. 2002).

Obesity is a complex condition, with many causes and consequences. It is a major risk factor for a number of chronic diseases, including heart disease, diabetes, and certain types of cancer. Obesity is also associated with a number of psychological and social problems, including depression, low self-esteem, and discrimination. The causes of obesity are complex, involving a combination of genetic, environmental, and behavioral factors.

One of the most common causes of obesity is a combination of a sedentary lifestyle and a diet high in calories and fat. In the United States, the average person spends more time sitting or lying down than standing or walking. This is due to a number of factors, including the increasing use of cars, the increasing use of computers, and the increasing use of television.

Another major cause of obesity is a diet high in calories and fat. In the United States, the average person consumes more calories than they need, and a large portion of those calories come from fat. This is due to a number of factors, including the increasing use of fast food, the increasing use of processed foods, and the increasing use of sugary drinks.

Obesity is a complex condition, and it is important to understand the causes and consequences of this condition. In the United States, the prevalence of obesity has increased significantly in the past few decades, and this trend is likely to continue. It is important to take steps to prevent and treat obesity, as it is a major risk factor for a number of chronic diseases.

One of the most important steps to prevent and treat obesity is to increase physical activity. In the United States, the average person spends more time sitting or lying down than standing or walking. This is due to a number of factors, including the increasing use of cars, the increasing use of computers, and the increasing use of television.

Another important step to prevent and treat obesity is to eat a healthy diet. In the United States, the average person consumes more calories than they need, and a large portion of those calories come from fat. This is due to a number of factors, including the increasing use of fast food, the increasing use of processed foods, and the increasing use of sugary drinks.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998 (Department of Health 1999).

There is a growing emphasis on the need to improve the quality of care and to ensure that the public sector is cost-effective. The Department of Health (1999) has set out a number of key objectives for the public sector, including:

- To improve the quality of care and to ensure that the public sector is cost-effective.
- To improve the efficiency of the public sector.
- To improve the effectiveness of the public sector.

These objectives are reflected in the Department of Health's (1999) 'New Deal for Patients' and 'New Deal for Management' initiatives.

The Department of Health (1999) has also set out a number of key objectives for the public sector, including:

- To improve the quality of care and to ensure that the public sector is cost-effective.
- To improve the efficiency of the public sector.
- To improve the effectiveness of the public sector.

These objectives are reflected in the Department of Health's (1999) 'New Deal for Patients' and 'New Deal for Management' initiatives.

The Department of Health (1999) has also set out a number of key objectives for the public sector, including:

- To improve the quality of care and to ensure that the public sector is cost-effective.
- To improve the efficiency of the public sector.
- To improve the effectiveness of the public sector.

These objectives are reflected in the Department of Health's (1999) 'New Deal for Patients' and 'New Deal for Management' initiatives.

The Department of Health (1999) has also set out a number of key objectives for the public sector, including:

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a great-grandchild, with 1.5 million people living with a great-grandchild employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a great-grandchild, with 1.5 million people living with a great-grandchild employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key priorities for the NHS to meet the needs of older people. These priorities are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

These priorities are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 3.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' of care for the ageing population, which is based on the principles of 'active ageing'. This paradigm is based on the idea that ageing is a process, and that people should be encouraged to remain active and engaged in their communities. The Department of Health (1999) has identified a number of key areas for action, including: (1) promoting healthy living; (2) providing social and community support; (3) ensuring access to health and social care services; and (4) promoting the participation of older people in decision-making.

The Department of Health (1999) has also identified a number of key challenges for the ageing population, including: (1) the need to address the health and social care needs of older people; (2) the need to ensure that older people have access to the services and resources they need; and (3) the need to ensure that older people are able to participate in decision-making. The Department of Health (1999) has identified a number of key strategies to address these challenges, including: (1) promoting healthy living; (2) providing social and community support; (3) ensuring access to health and social care services; and (4) promoting the participation of older people in decision-making.

The Department of Health (1999) has also identified a number of key areas for research, including: (1) the need to develop new and innovative ways of providing health and social care services; (2) the need to develop new and innovative ways of promoting healthy living; (3) the need to develop new and innovative ways of providing social and community support; and (4) the need to develop new and innovative ways of ensuring access to health and social care services. The Department of Health (1999) has identified a number of key research priorities, including: (1) the need to develop new and innovative ways of providing health and social care services; (2) the need to develop new and innovative ways of promoting healthy living; (3) the need to develop new and innovative ways of providing social and community support; and (4) the need to develop new and innovative ways of ensuring access to health and social care services.

The Department of Health (1999) has also identified a number of key areas for action, including: (1) promoting healthy living; (2) providing social and community support; (3) ensuring access to health and social care services; and (4) promoting the participation of older people in decision-making. the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 7.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for health care, which is based on the principles of prevention, promotion, and protection. The new paradigm is based on the idea of 'active ageing', which is the process of maintaining and enhancing the health and well-being of older people. The new paradigm is based on the idea of 'active ageing', which is the process of maintaining and enhancing the health and well-being of older people.

The new paradigm is based on the idea of 'active ageing', which is the process of maintaining and enhancing the health and well-being of older people. The new paradigm is based on the idea of 'active ageing', which is the process of maintaining and enhancing the health and well-being of older people.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations 1999).

There are a number of reasons why the world population is ageing. First, the number of people who are aged 65 and over has increased because of the increase in life expectancy. Second, the number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over. Third, the number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over.

The increase in the number of people who are aged 65 and over has a number of implications for the world. First, it has led to an increase in the number of people who are aged 65 and over.

Second, it has led to an increase in the number of people who are aged 65 and over.

Third, it has led to an increase in the number of people who are aged 65 and over.

Fourth, it has led to an increase in the number of people who are aged 65 and over.

Fifth, it has led to an increase in the number of people who are aged 65 and over.

Sixth, it has led to an increase in the number of people who are aged 65 and over.

Seventh, it has led to an increase in the number of people who are aged 65 and over.

Eighth, it has led to an increase in the number of people who are aged 65 and over.

Ninth, it has led to an increase in the number of people who are aged 65 and over.

Tenth, it has led to an increase in the number of people who are aged 65 and over.

Eleventh, it has led to an increase in the number of people who are aged 65 and over.

Twelfth, it has led to an increase in the number of people who are aged 65 and over.

Thirteenth, it has led to an increase in the number of people who are aged 65 and over.

Fourteenth, it has led to an increase in the number of people who are aged 65 and over.

Fifteenth, it has led to an increase in the number of people who are aged 65 and over.

the 1990s, the number of people in the UK who are employed in the public sector has increased from 1.5 million to 2.5 million (16% of the population). The public sector has become a major employer in the UK, and this has led to a number of problems, including a decline in productivity, a decline in quality of service, and a decline in the morale of public sector employees.

One of the main reasons for the decline in productivity in the public sector is the lack of competition. In the private sector, companies are forced to compete for customers, and this leads to a focus on efficiency and productivity. In the public sector, however, there is no competition, and this leads to a lack of focus on efficiency and productivity.

Another reason for the decline in quality of service in the public sector is the lack of accountability. In the private sector, companies are accountable to their customers, and this leads to a focus on quality of service. In the public sector, however, there is no accountability, and this leads to a decline in quality of service.

Finally, the decline in the morale of public sector employees is due to a number of factors, including a lack of job satisfaction, a lack of career progression, and a lack of recognition. In the private sector, employees are often motivated by a combination of these factors, and this leads to a high level of morale.

In conclusion, the public sector has become a major employer in the UK, and this has led to a number of problems, including a decline in productivity, a decline in quality of service, and a decline in the morale of public sector employees. These problems are due to a number of factors, including a lack of competition, a lack of accountability, and a lack of job satisfaction.

In conclusion, the public sector has become a major employer in the UK, and this has led to a number of problems, including a decline in productivity, a decline in quality of service, and a decline in the morale of public sector employees. These problems are due to a number of factors, including a lack of competition, a lack of accountability, and a lack of job satisfaction.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.5 billion (United Nations 1999). The number of children in the world who are under 5 years of age has increased by 1 billion in the same period. The number of children in the world who are under 15 years of age is now 2.5 billion (United Nations 1999).

There is a growing concern that the rapid increase in the number of children in the world is leading to a decline in the quality of life for children. This is because the rapid increase in the number of children is leading to a decline in the resources available to each child. This is particularly true in developing countries, where the resources available to each child are already limited. This is a major concern for the world's leaders, who are trying to find ways to improve the quality of life for children in the world.

One of the ways to improve the quality of life for children is to improve the quality of the environment. This is because the quality of the environment has a direct impact on the quality of life for children. For example, if the environment is polluted, children are more likely to get sick. If the environment is clean, children are more likely to be healthy. This is why it is so important to improve the quality of the environment for children.

Another way to improve the quality of life for children is to improve the quality of the education system. This is because the quality of the education system has a direct impact on the quality of life for children. For example, if the education system is poor, children are more likely to be illiterate. If the education system is good, children are more likely to be literate. This is why it is so important to improve the quality of the education system for children.

There are many other ways to improve the quality of life for children, but these are the two most important. If we can improve the quality of the environment and the quality of the education system, we can improve the quality of life for children in the world. This is a goal that we should all strive to achieve.
