the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1998 (Department of Health 1999).

There is a growing emphasis on the importance of the public sector in the provision of health care, and the need to ensure that it is able to meet the needs of the population. This has led to a number of initiatives to improve the efficiency and effectiveness of the public sector.

One of the main initiatives is the introduction of the Health Service Act 1990, which gave the Secretary of State for Health the power to reorganise the health service. This has led to a number of major reorganisations, including the creation of the National Health Service (NHS) in 1948.

Another initiative is the introduction of the Health Service Act 1999, which gave the Secretary of State for Health the power to reorganise the health service. This has led to a number of major reorganisations, including the creation of the NHS in 1948.

A third initiative is the introduction of the Health Service Act 2001, which gave the Secretary of State for Health the power to reorganise the health service. This has led to a number of major reorganisations, including the creation of the NHS in 1948.

These initiatives have led to a number of major reorganisations of the health service, and have helped to improve the efficiency and effectiveness of the public sector. However, there is still a need to ensure that the public sector is able to meet the needs of the population.
