the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 50% of the public sector workforce being female in 1995 (Department of Social Security 1996).

There are a number of reasons why the public sector has become an important employer of women. First, the public sector has a high proportion of female employees in a number of key areas, such as health care, education and social services. Second, the public sector has a high proportion of part-time employees, which is attractive to women who are balancing work and family responsibilities. Third, the public sector has a high proportion of employees who are employed on a permanent basis, which is attractive to women who are seeking long-term employment.

There are a number of reasons why the public sector has become an important employer of women. First, the public sector has a high proportion of female employees in a number of key areas, such as health care, education and social services. Second, the public sector has a high proportion of part-time employees, which is attractive to women who are balancing work and family responsibilities. the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'communication' field is defined as:

...the study of the processes of communication production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information science' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information studies' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information technology' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information systems' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information management' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information policy' field is defined as:

...the study of the processes of information production, distribution, access, use and evaluation, and the study of the social, cultural, economic and political contexts in which these processes take place. (p. 10)

The 'information law' field is defined as:

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used. (p. 1)

These definitions are not intended to be exhaustive, but they do provide a starting point for the discussion of the relationship between the two fields.

The relationship between the two fields is complex and multifaceted. It is a relationship that has evolved over time and is still evolving.

In the early days of the field, the two were often seen as separate and distinct. However, as the field has grown and matured, the boundaries between them have become increasingly blurred.

Today, the two fields are often seen as overlapping and interrelated. They are both essential components of the larger field of information science.

The relationship between the two fields is a topic that has been discussed and debated for many years. It is a topic that is still relevant and important today.

In this paper, we will explore the relationship between the two fields and discuss some of the challenges and opportunities that they present.

We will begin by looking at the history of the two fields and how they have evolved over time. We will then look at the current state of the field and the challenges that it faces.

Finally, we will discuss some of the opportunities that the field presents and how we can best use these opportunities to advance the field and its goals.

We hope that this paper will provide a useful overview of the relationship between the two fields and help to advance the field of information science.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major provider of social services, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major provider of social services, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major provider of health services, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major provider of health services, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major provider of education services, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major provider of education services, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major provider of housing services, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major provider of housing services, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major provider of transport services, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major provider of transport services, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major provider of cultural services, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major provider of cultural services, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector has also become a major provider of leisure services, and this has implications for the way in which the public sector is managed and the way in which it is funded. The public sector has become a major provider of leisure services, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.

The 'information' field is defined as:

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This pressure is caused by a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing need for public services.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done in a number of ways, including the privatization of public services, the introduction of competitive tendering, and the introduction of public-private partnerships.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done in a number of ways, including the merging of public services, the restructuring of public services, and the introduction of new public services.

Finally, the efficiency of the public sector can be improved by the introduction of new management practices. These practices can include the introduction of new management systems, the introduction of new management techniques, and the introduction of new management tools.

There are a number of challenges associated with improving the efficiency of the public sector. These challenges include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of new management practices. These practices can include the use of performance indicators, the use of budgeting, and the use of quality management systems.

There are a number of challenges associated with improving the efficiency of the public sector. These challenges include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of new management practices.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own objectives and its own way of working. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care and to ensure that the public sector is cost-effective. The Department of Health has set out a number of targets for the public sector, including the need to reduce the number of people waiting for treatment, to improve the quality of care, and to ensure that the public sector is cost-effective (Department of Health 2000).

One of the ways in which the public sector can improve its performance is by using evidence-based practice. Evidence-based practice is the use of the best available evidence to guide clinical decisions. It involves the use of research evidence, clinical expertise, and patient preferences to make decisions about the best way to care for a patient (Roberts et al. 2002).

There are a number of reasons why evidence-based practice is important. First, it helps to ensure that patients receive the best possible care. Second, it helps to reduce the risk of errors. Third, it helps to ensure that the public sector is cost-effective. Fourth, it helps to improve the quality of care. Finally, it helps to ensure that the public sector is accountable to the public (Roberts et al. 2002).

There are a number of challenges to the implementation of evidence-based practice. First, there is a need for high-quality evidence. Second, there is a need for clinical expertise. Third, there is a need for patient participation. Fourth, there is a need for a supportive environment. Finally, there is a need for ongoing evaluation and improvement (Roberts et al. 2002).

There are a number of ways in which the public sector can overcome these challenges. First, it can invest in research to produce high-quality evidence. Second, it can provide training and support for clinical staff. Third, it can encourage patient participation. Fourth, it can create a supportive environment. Finally, it can implement ongoing evaluation and improvement (Roberts et al. 2002).

There are a number of benefits to the implementation of evidence-based practice. First, it helps to ensure that patients receive the best possible care. Second, it helps to reduce the risk of errors. Third, it helps to ensure that the public sector is cost-effective. Fourth, it helps to improve the quality of care. Finally, it helps to ensure that the public sector is accountable to the public (Roberts et al. 2002).

There are a number of examples of the implementation of evidence-based practice in the public sector. For example, the National Institute for Clinical Excellence (NICE) has developed a number of guidelines for the treatment of various conditions. These guidelines are based on the best available evidence and are used by clinical staff to guide their decisions (NICE 2002).

Another example is the use of clinical pathways. Clinical pathways are a series of steps that outline the best way to care for a patient. They are based on the best available evidence and are used by clinical staff to guide their decisions (Roberts et al. 2002).

There are a number of factors that can influence the implementation of evidence-based practice. These include the quality of the evidence, the clinical expertise of the staff, the patient's preferences, the supportive environment, and the ongoing evaluation and improvement (Roberts et al. 2002).

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the private sector has increased by 1.7 million (1990–1999).

There is a growing emphasis on the need to improve the quality of care in the public sector. The Department of Health (1999) has set out a number of targets for the public sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the private sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the voluntary sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

The Department of Health (1999) has also set out a number of targets for the independent sector, including the need to improve the quality of care, to reduce waiting times, and to improve the efficiency of the system.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the former Soviet Union, with 1.5 million people from the former Soviet Union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Caribbean, with 1.5 million people from the Caribbean employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Indian subcontinent, with 1.5 million people from the Indian subcontinent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Middle East, with 1.5 million people from the Middle East employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Pacific Islands, with 1.5 million people from the Pacific Islands employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Philippines, with 1.5 million people from the Philippines employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Republic of Ireland, with 1.5 million people from the Republic of Ireland employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the United States, with 1.5 million people from the United States employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the European Union, with 1.5 million people from the European Union employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Commonwealth of Independent States, with 1.5 million people from the Commonwealth of Independent States employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the African continent, with 1.5 million people from the African continent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Asian continent, with 1.5 million people from the Asian continent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Latin American continent, with 1.5 million people from the Latin American continent employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Middle East and North Africa, with 1.5 million people from the Middle East and North Africa employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the South and Central America, with 1.5 million people from the South and Central America employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Caribbean, with 1.5 million people from the Caribbean employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the Pacific Islands, with 1.5 million people from the Pacific Islands employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Philippines, with 1.5 million people from the Philippines employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Republic of Ireland, with 1.5 million people from the Republic of Ireland employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people from the United States, with 1.5 million people from the United States employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the European Union, with 1.5 million people from the European Union employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from the Commonwealth of Independent States, with 1.5 million people from the Commonwealth of Independent States employed in the public sector in 1995, compared with 1 million in 1980.

the 'information' and 'communication' fields. The 'information' field is defined as:

...the study of the nature, uses and functions of information, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

The 'communication' field is defined as:

...the study of the nature, uses and functions of communication, and the ways in which it is created, communicated, evaluated and used as a resource for individual and social development. (p. 1)

These definitions are very broad and cover a wide range of topics. They are also very similar to each other, which suggests that the two fields are closely related.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this has implications for the way in which it is managed and the way in which it is funded.
