the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999 (Department of Health 2000).

There is a growing emphasis on the importance of the public sector in the provision of health care, and the need to ensure that the public sector is able to meet the needs of the population (Department of Health 2000).

The public sector is also responsible for the provision of health care to the most vulnerable members of the population, including the elderly, the disabled, and the mentally ill (Department of Health 2000).

The public sector is also responsible for the provision of health care to the most vulnerable members of the population, including the elderly, the disabled, and the mentally ill (Department of Health 2000).
