the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of new management practices. The aim of these initiatives is to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public.

One of the key challenges facing the public sector is the need to improve the efficiency of the public sector. This is a complex task, and it requires a number of different approaches. One approach is to introduce competition, which can help to improve the efficiency of the public sector by forcing public sector organisations to compete with private sector organisations. Another approach is to restructure public sector organisations, which can help to improve the efficiency of the public sector by reducing the number of public sector organisations and by improving the way in which public sector organisations are organised.

Another approach is to introduce new management practices, which can help to improve the efficiency of the public sector by improving the way in which public sector organisations are managed. This can include the introduction of new management systems, the introduction of new management practices, and the introduction of new management structures. The aim of these initiatives is to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public.
