the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office of National Statistics, 2001).

There is a growing awareness of the need to address the health care needs of older people. The Department of Health (2000) has set out a vision for the future of health care for older people, and the National Institute for Clinical Excellence (NICE) (2001) has published guidance on the management of older people with common chronic conditions.

There is a need to ensure that health care professionals are equipped with the knowledge and skills to meet the needs of older people. This paper discusses the current state of research in this area and the implications for practice.

## Background

The World Health Organization (WHO) (1990) has defined ageing as a process of becoming older, which is influenced by a number of factors, including genetics, environment, and lifestyle.

The WHO (1990) has also defined health as a state of complete physical, mental, and social well-being, and not merely the absence of disease or infirmity.

The WHO (1990) has identified a number of key areas for research in ageing, including the following:

- The role of genetics in ageing.
- The role of environment in ageing.
- The role of lifestyle in ageing.

The WHO (1990) has also identified a number of key areas for research in health, including the following:

- The role of physical health in health.
- The role of mental health in health.
- The role of social health in health.

The WHO (1990) has also identified a number of key areas for research in the management of older people, including the following:

- The role of health care professionals in the management of older people.
- The role of the family in the management of older people.
- The role of the community in the management of older people.

The WHO (1990) has also identified a number of key areas for research in the prevention of disease in older people, including the following:

- The role of health care professionals in the prevention of disease in older people.
- The role of the family in the prevention of disease in older people.
- The role of the community in the prevention of disease in older people.

The WHO (1990) has also identified a number of key areas for research in the promotion of health in older people, including the following:

- The role of health care professionals in the promotion of health in older people.
- The role of the family in the promotion of health in older people.
- The role of the community in the promotion of health in older people.

The WHO (1990) has also identified a number of key areas for research in the management of chronic disease in older people, including the following:

- The role of health care professionals in the management of chronic disease in older people.
- The role of the family in the management of chronic disease in older people.
- The role of the community in the management of chronic disease in older people.

The WHO (1990) has also identified a number of key areas for research in the prevention of disability in older people, including the following:

- The role of health care professionals in the prevention of disability in older people.
- The role of the family in the prevention of disability in older people.
- The role of the community in the prevention of disability in older people.

The WHO (1990) has also identified a number of key areas for research in the promotion of independence in older people, including the following:

- The role of health care professionals in the promotion of independence in older people.
- The role of the family in the promotion of independence in older people.
- The role of the community in the promotion of independence in older people.

The WHO (1990) has also identified a number of key areas for research in the management of mental health problems in older people, including the following:

- The role of health care professionals in the management of mental health problems in older people.
- The role of the family in the management of mental health problems in older people.
- The role of the community in the management of mental health problems in older people.

The WHO (1990) has also identified a number of key areas for research in the prevention of suicide in older people, including the following:

- The role of health care professionals in the prevention of suicide in older people.
- The role of the family in the prevention of suicide in older people.
- The role of the community in the prevention of suicide in older people.
