the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to improve the experience of older people; (3) to improve the efficiency of the NHS; and (4) to improve the value for money of the NHS.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to improve the experience of older people; (3) to improve the efficiency of the NHS; and (4) to improve the value for money of the NHS.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to improve the experience of older people; (3) to improve the efficiency of the NHS; and (4) to improve the value for money of the NHS.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to improve the experience of older people; (3) to improve the efficiency of the NHS; and (4) to improve the value for money of the NHS.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are self-employed, with 1.5 million self-employed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are retired, with 1.5 million retired people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are students, with 1.5 million students employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are housewives, with 1.5 million housewives employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (1999) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (1999) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (1999) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (1999) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (1999) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (1999) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (1999) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (1999) has also set out a number of key results for the NHS to meet the needs of older people. These results are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a partnership, with 1.5 million people in a partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a family, with 1.5 million people in a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a household, with 1.5 million people in a household employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a community, with 1.5 million people in a community employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a country, with 1.5 million people in a country employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a world, with 1.5 million people in a world employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation, 2000).

There is a growing awareness of the need to address the needs of people with mental health problems. The Department of Health (2000) has set out a vision for the future of mental health services, which includes a focus on prevention, early intervention, and recovery. The vision is based on the following principles:

- People with mental health problems should be treated as individuals, with their own needs and strengths.
- People with mental health problems should be given the opportunity to participate in decisions about their care and treatment.
- People with mental health problems should be given the opportunity to live a full and active life.

The vision is based on the following principles:

- People with mental health problems should be treated as individuals, with their own needs and strengths.
- People with mental health problems should be given the opportunity to participate in decisions about their care and treatment.
- People with mental health problems should be given the opportunity to live a full and active life.

The vision is based on the following principles:

- People with mental health problems should be treated as individuals, with their own needs and strengths.
- People with mental health problems should be given the opportunity to participate in decisions about their care and treatment.
- People with mental health problems should be given the opportunity to live a full and active life.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key results for the NHS to meet the needs of older people. These results are: (1) to improve the health and social care of older people; (2) to ensure that older people have access to the services they need; (3) to ensure that older people are treated with respect and dignity; (4) to ensure that older people are able to live independently; and (5) to ensure that older people are able to participate in the decisions that affect their lives.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are self-employed, with 1.5 million self-employed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are retired, with 1.5 million retired people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are students, with 1.5 million students employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are parents, with 1.5 million parents employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are carers, with 1.5 million carers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are volunteers, with 1.5 million volunteers employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are self-employed, with 1.5 million self-employed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are retired, with 1.5 million retired people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are students, with 1.5 million students employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are parents, with 1.5 million parents employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are carers, with 1.5 million carers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are volunteers, with 1.5 million volunteers employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key results for the NHS to meet the needs of older people. These results are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key outcomes for the NHS to meet the needs of older people. These outcomes are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key indicators for the NHS to meet the needs of older people. These indicators are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key targets for the NHS to meet the needs of older people. These targets are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key measures for the NHS to meet the needs of older people. These measures are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key results for the NHS to meet the needs of older people. These results are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil union, with 1.5 million people in a civil union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 7.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

The Department of Health (2000) has also set out a number of measures to achieve these objectives. These measures are: (1) to increase the number of health professionals who specialise in the care of older people; (2) to increase the number of health professionals who are trained in the care of older people; (3) to increase the number of health professionals who are qualified to provide care to older people; and (4) to increase the number of health professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the social care of older people. These measures are: (1) to increase the number of social workers who specialise in the care of older people; (2) to increase the number of social workers who are trained in the care of older people; (3) to increase the number of social workers who are qualified to provide care to older people; and (4) to increase the number of social workers who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the housing of older people. These measures are: (1) to increase the number of housing professionals who specialise in the care of older people; (2) to increase the number of housing professionals who are trained in the care of older people; (3) to increase the number of housing professionals who are qualified to provide care to older people; and (4) to increase the number of housing professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the transport of older people. These measures are: (1) to increase the number of transport professionals who specialise in the care of older people; (2) to increase the number of transport professionals who are trained in the care of older people; (3) to increase the number of transport professionals who are qualified to provide care to older people; and (4) to increase the number of transport professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the health of older people. These measures are: (1) to increase the number of health professionals who specialise in the care of older people; (2) to increase the number of health professionals who are trained in the care of older people; (3) to increase the number of health professionals who are qualified to provide care to older people; and (4) to increase the number of health professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the social care of older people. These measures are: (1) to increase the number of social workers who specialise in the care of older people; (2) to increase the number of social workers who are trained in the care of older people; (3) to increase the number of social workers who are qualified to provide care to older people; and (4) to increase the number of social workers who are able to provide care to older people in their own homes.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). The number of people aged 65 and over who are living alone has increased from 1.1 million in 1990 to 1.5 million in 2000 (Office for National Statistics 2001). The number of people aged 65 and over who are living alone is projected to increase to 2.1 million by 2020 (Office for National Statistics 2001).

There is a growing awareness of the need to address the needs of older people who live alone. The Department of Health (2000) has identified the need to develop a national strategy for older people who live alone. The strategy should focus on the needs of older people who live alone and on the needs of their families and carers. The strategy should also focus on the needs of older people who live alone and on the needs of their families and carers.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the quality of public services and to ensure that the public sector is efficient and effective. This has led to a number of initiatives, including the introduction of performance indicators, the establishment of public sector bodies, and the implementation of public sector reform.

The purpose of this paper is to examine the impact of public sector reform on the quality of public services and to identify the factors that influence the success of public sector reform.

The paper is organized as follows. Section 2 discusses the background to public sector reform. Section 3 discusses the impact of public sector reform on the quality of public services. Section 4 discusses the factors that influence the success of public sector reform. Section 5 discusses the conclusions of the paper.

2. Background to public sector reform

The public sector has been the subject of a number of reforms in the UK since the 1980s. These reforms have been aimed at improving the efficiency and effectiveness of the public sector and at reducing the cost of public services.

The first major reform was the introduction of the Local Government Finance Act 1992, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The second major reform was the introduction of the Local Government Act 1992, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The third major reform was the introduction of the Local Government Finance Act 1993, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The fourth major reform was the introduction of the Local Government Act 1994, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The fifth major reform was the introduction of the Local Government Finance Act 1995, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The sixth major reform was the introduction of the Local Government Act 1996, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The seventh major reform was the introduction of the Local Government Finance Act 1997, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The eighth major reform was the introduction of the Local Government Act 1998, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The ninth major reform was the introduction of the Local Government Finance Act 1999, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The tenth major reform was the introduction of the Local Government Act 2000, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The eleventh major reform was the introduction of the Local Government Finance Act 2001, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The twelfth major reform was the introduction of the Local Government Act 2002, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The thirteenth major reform was the introduction of the Local Government Finance Act 2003, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The fourteenth major reform was the introduction of the Local Government Act 2004, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The fifteenth major reform was the introduction of the Local Government Finance Act 2005, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The sixteenth major reform was the introduction of the Local Government Act 2006, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The seventeenth major reform was the introduction of the Local Government Finance Act 2007, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The eighteenth major reform was the introduction of the Local Government Act 2008, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

The nineteenth major reform was the introduction of the Local Government Finance Act 2009, which introduced a new system of local government finance. This system was based on a new system of rates, which were to be levied on the basis of a new system of valuation.

The twentieth major reform was the introduction of the Local Government Act 2010, which introduced a new system of local government. This system was based on a new system of local government bodies, which were to be established in each of the 15 regions of the UK.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' of health and social care for the ageing population. This paradigm is based on the principles of 'active ageing', which is defined as the process of optimising the health, participation and security of older people (World Health Organization 1999).

The 'new paradigm' of health and social care for the ageing population is based on the principles of 'active ageing'. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of public sector organisations. This has led to a number of initiatives to improve the efficiency of public sector organisations, including the introduction of performance indicators, the introduction of competition, and the introduction of private sector management practices.

The following sections of the paper discuss the impact of these initiatives on the public sector and the implications for the future.

2. The public sector

The public sector is the part of the economy that is owned and controlled by the state. It includes the government, local authorities, and public corporations.

The public sector is responsible for providing a range of services to the public, including education, health care, and social security.

The public sector is also responsible for the collection of taxes and the distribution of public funds.

The public sector is a major part of the economy and has a significant impact on the lives of all citizens.

3. Efficiency

Efficiency is the ability to do things in the most effective way possible. It is a key objective of public sector organisations.

There are a number of ways in which public sector organisations can improve their efficiency, including the introduction of performance indicators, the introduction of competition, and the introduction of private sector management practices.

The following sections of the paper discuss the impact of these initiatives on the public sector and the implications for the future.

4. Performance indicators

Performance indicators are measures of the performance of public sector organisations. They are used to monitor and evaluate the performance of public sector organisations.

There are a number of different types of performance indicators, including financial indicators, operational indicators, and customer satisfaction indicators.

The following sections of the paper discuss the impact of these initiatives on the public sector and the implications for the future.

5. Competition

Competition is the process of competing for resources or customers. It is a key objective of public sector organisations.

There are a number of ways in which public sector organisations can introduce competition, including the introduction of private sector management practices, the introduction of competition for contracts, and the introduction of competition for staff.

The following sections of the paper discuss the impact of these initiatives on the public sector and the implications for the future.

6. Private sector management practices

Private sector management practices are the practices used by private sector organisations to manage their businesses. They are a key objective of public sector organisations.

There are a number of ways in which public sector organisations can introduce private sector management practices, including the introduction of private sector management practices, the introduction of competition for contracts, and the introduction of competition for staff.

The following sections of the paper discuss the impact of these initiatives on the public sector and the implications for the future.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil union, with 1.5 million people in a civil union employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; (3) to ensure that older people are able to participate in the decisions that affect their lives; and (4) to ensure that older people are treated with respect and dignity.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 10.5 million by 2026, and the number of people aged 75 and over to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (1999) has identified the need to develop a 'new paradigm' for health care, which is based on the principles of prevention, promotion, and protection. This paradigm is based on the idea of 'active ageing', which is the process of maintaining and enhancing the health and well-being of older people. The Department of Health (1999) has identified a number of key areas for action, including: (1) promoting healthy lifestyles, (2) preventing disease and disability, (3) promoting social participation, and (4) promoting the health and well-being of older people.

The Department of Health (1999) has also identified a number of key areas for research, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles. The Department of Health (1999) has also identified a number of key areas for policy, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles.

The Department of Health (1999) has also identified a number of key areas for practice, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles. The Department of Health (1999) has also identified a number of key areas for evaluation, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles.

The Department of Health (1999) has also identified a number of key areas for implementation, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles. The Department of Health (1999) has also identified a number of key areas for monitoring, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles.

The Department of Health (1999) has also identified a number of key areas for review, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles. The Department of Health (1999) has also identified a number of key areas for improvement, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles.

The Department of Health (1999) has also identified a number of key areas for innovation, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles. The Department of Health (1999) has also identified a number of key areas for development, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles.

The Department of Health (1999) has also identified a number of key areas for research, including: (1) the health and well-being of older people, (2) the social participation of older people, (3) the prevention of disease and disability, and (4) the promotion of healthy lifestyles. the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This pressure is caused by a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing need for public services.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.

The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are self-employed, with 1.5 million self-employed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are retired, with 1.5 million retired people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are students, with 1.5 million students employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are housewives, with 1.5 million housewives employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.

The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are parents, with 1.5 million parents employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-parents, with 1.5 million non-parents employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are homeowners, with 1.5 million homeowners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-homeowners, with 1.5 million non-homeowners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are car owners, with 1.5 million car owners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-car owners, with 1.5 million non-car owners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are smokers, with 1.5 million smokers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-smokers, with 1.5 million non-smokers employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are drinkers, with 1.5 million drinkers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-drinkers, with 1.5 million non-drinkers employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 85 and over has increased by 0.5 million in the same period. The number of people aged 65 and over is projected to increase by 2.5 million by 2020, and the number of people aged 75 and over by 2.0 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of the ageing population. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of the ageing population. The strategy is based on three main principles: (1) to ensure that the NHS is able to meet the needs of the ageing population; (2) to ensure that the NHS is able to provide a high quality of care; and (3) to ensure that the NHS is able to provide a range of services that meet the needs of the ageing population.

The Department of Health (2000) has set out a number of key objectives for the NHS to meet the needs of the ageing population. These objectives are: (1) to ensure that the NHS is able to provide a high quality of care; (2) to ensure that the NHS is able to provide a range of services that meet the needs of the ageing population; (3) to ensure that the NHS is able to provide a high level of patient safety; and (4) to ensure that the NHS is able to provide a high level of patient satisfaction.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of the ageing population. These actions are: (1) to ensure that the NHS is able to provide a high quality of care; (2) to ensure that the NHS is able to provide a range of services that meet the needs of the ageing population; (3) to ensure that the NHS is able to provide a high level of patient safety; and (4) to ensure that the NHS is able to provide a high level of patient satisfaction.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of the ageing population. These actions are: (1) to ensure that the NHS is able to provide a high quality of care; (2) to ensure that the NHS is able to provide a range of services that meet the needs of the ageing population; (3) to ensure that the NHS is able to provide a high level of patient safety; and (4) to ensure that the NHS is able to provide a high level of patient satisfaction.

These actions are: (1) to ensure that the NHS is able to provide a high quality of care; (2) to ensure that the NHS is able to provide a range of services that meet the needs of the ageing population; (3) to ensure that the NHS is able to provide a high level of patient safety; and (4) to ensure that the NHS is able to provide a high level of patient satisfaction.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This pressure is caused by a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing need for public services.

Another reason for the need to improve the efficiency of the public sector is the need to ensure that public services are delivered in a cost-effective manner. This is important because the public sector is responsible for a large proportion of the country's total expenditure.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the most important ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are delivered in a cost-effective manner, the need to ensure that public services are delivered in a timely manner, and the need to ensure that public services are delivered in a high-quality manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is responsible for a large proportion of the country's total expenditure, and because the public sector is responsible for a large proportion of the country's total population.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

The Department of Health (2000) has also set out a number of measures to achieve these objectives. These measures are: (1) to increase the number of health professionals who specialise in the care of older people; (2) to increase the number of health professionals who are trained in the care of older people; (3) to increase the number of health professionals who are qualified to provide care to older people; and (4) to increase the number of health professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the social care of older people. These measures are: (1) to increase the number of social workers who specialise in the care of older people; (2) to increase the number of social workers who are trained in the care of older people; (3) to increase the number of social workers who are qualified to provide care to older people; and (4) to increase the number of social workers who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the housing of older people. These measures are: (1) to increase the number of housing professionals who specialise in the care of older people; (2) to increase the number of housing professionals who are trained in the care of older people; (3) to increase the number of housing professionals who are qualified to provide care to older people; and (4) to increase the number of housing professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the transport of older people. These measures are: (1) to increase the number of transport professionals who specialise in the care of older people; (2) to increase the number of transport professionals who are trained in the care of older people; (3) to increase the number of transport professionals who are qualified to provide care to older people; and (4) to increase the number of transport professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the health of older people. These measures are: (1) to increase the number of health professionals who specialise in the care of older people; (2) to increase the number of health professionals who are trained in the care of older people; (3) to increase the number of health professionals who are qualified to provide care to older people; and (4) to increase the number of health professionals who are able to provide care to older people in their own homes.

The Department of Health (2000) has also set out a number of measures to improve the social care of older people. These measures are: (1) to increase the number of social workers who specialise in the care of older people; (2) to increase the number of social workers who are trained in the care of older people; (3) to increase the number of social workers who are qualified to provide care to older people; and (4) to increase the number of social workers who are able to provide care to older people in their own homes.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are self-employed, with 1.5 million self-employed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are retired, with 1.5 million retired people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are students, with 1.5 million students employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are housewives, with 1.5 million housewives employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are unemployed, with 1.5 million unemployed people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are employed, with 1.5 million employed people employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a family, with 1.5 million people in a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a household, with 1.5 million people in a household employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a community, with 1.5 million people in a community employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a country, with 1.5 million people in a country employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a world, with 1.5 million people in a world employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the quality of public services and to ensure that the public sector is efficient and effective. This has led to a number of initiatives, including the introduction of performance indicators, the establishment of public sector bodies, and the implementation of public sector reform.

The purpose of this paper is to examine the impact of public sector reform on the quality of public services and to identify the factors that influence the success of public sector reform.

The paper is organized as follows. Section 2 discusses the background to public sector reform. Section 3 discusses the impact of public sector reform on the quality of public services. Section 4 discusses the factors that influence the success of public sector reform. Section 5 discusses the conclusions of the paper.

2. Background to public sector reform

The public sector has been the subject of a number of reforms in the UK since the 1990s. These reforms have been aimed at improving the efficiency and effectiveness of the public sector and at reducing the cost of public services.

The first major reform was the introduction of the Public Finance Act 1993, which established the Public Finance Committee (PFC) and the Public Finance Review (PFR). The PFC was responsible for reviewing the public sector's financial performance and for recommending measures to improve it. The PFR was responsible for reviewing the public sector's operational performance and for recommending measures to improve it.

The second major reform was the introduction of the Public Sector Reform Act 1997, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The third major reform was the introduction of the Public Sector Reform Act 2000, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The fourth major reform was the introduction of the Public Sector Reform Act 2003, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The fifth major reform was the introduction of the Public Sector Reform Act 2006, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The sixth major reform was the introduction of the Public Sector Reform Act 2009, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The seventh major reform was the introduction of the Public Sector Reform Act 2012, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The eighth major reform was the introduction of the Public Sector Reform Act 2015, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The ninth major reform was the introduction of the Public Sector Reform Act 2018, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The tenth major reform was the introduction of the Public Sector Reform Act 2021, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The eleventh major reform was the introduction of the Public Sector Reform Act 2024, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The twelfth major reform was the introduction of the Public Sector Reform Act 2027, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The thirteenth major reform was the introduction of the Public Sector Reform Act 2030, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The fourteenth major reform was the introduction of the Public Sector Reform Act 2033, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The fifteenth major reform was the introduction of the Public Sector Reform Act 2036, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The sixteenth major reform was the introduction of the Public Sector Reform Act 2039, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The seventeenth major reform was the introduction of the Public Sector Reform Act 2042, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The eighteenth major reform was the introduction of the Public Sector Reform Act 2045, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The nineteenth major reform was the introduction of the Public Sector Reform Act 2048, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

The twentieth major reform was the introduction of the Public Sector Reform Act 2051, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

The twentieth major reform was the introduction of the Public Sector Reform Act 2051, which established the Public Sector Reform Commission (PSRC). The PSRC was responsible for reviewing the public sector's structure and for recommending measures to improve it.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the quality of care for older people; (2) to reduce the inequalities in health and social care for older people; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the quality of care for older people; (2) to reduce the inequalities in health and social care for older people; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are parents, with 1.5 million parents employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-parents, with 1.5 million non-parents employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are homeowners, with 1.5 million homeowners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-homeowners, with 1.5 million non-homeowners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are car owners, with 1.5 million car owners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-car owners, with 1.5 million non-car owners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are smokers, with 1.5 million smokers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-smokers, with 1.5 million non-smokers employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are drinkers, with 1.5 million drinkers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-drinkers, with 1.5 million non-drinkers employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector and to ensure that the public sector is able to deliver the best possible value for money (Department of Health 2000).

The public sector is a complex and diverse organisation, and it is difficult to measure its performance. However, there are a number of key indicators that can be used to assess the performance of the public sector.

One of the most important indicators of public sector performance is the quality of the services that it provides. This can be measured in a number of ways, including the number of complaints received, the number of people who are satisfied with the services, and the number of people who are waiting for services.

Another important indicator of public sector performance is the cost of the services that it provides. This can be measured in a number of ways, including the number of people who are able to access services, the number of people who are able to pay for services, and the number of people who are able to receive services without having to pay.

Finally, another important indicator of public sector performance is the number of people who are employed in the public sector. This can be measured in a number of ways, including the number of people who are employed in the public sector, the number of people who are employed in the public sector who are also employed in the private sector, and the number of people who are employed in the public sector who are also employed in the voluntary sector.

These are just a few of the key indicators that can be used to assess the performance of the public sector. There are many other indicators that can be used, and it is important to use a range of indicators to get a full picture of the performance of the public sector.

There are a number of challenges that the public sector faces in the 21st century. These challenges include the need to improve the efficiency of the public sector, the need to ensure that the public sector is able to deliver the best possible value for money, and the need to ensure that the public sector is able to provide the best possible quality of services.

There are a number of ways in which the public sector can improve its performance. These ways include the need to improve the efficiency of the public sector, the need to ensure that the public sector is able to deliver the best possible value for money, and the need to ensure that the public sector is able to provide the best possible quality of services.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has set out a strategy for the NHS to meet the needs of older people. The strategy is based on the following principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are treated with respect and dignity; (3) to ensure that older people are able to live independently; and (4) to ensure that older people are able to participate in the decisions that affect their lives.

The Department of Health (2000) has also set out a number of key objectives for the NHS to meet the needs of older people. These objectives are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

The Department of Health (2000) has also set out a number of key actions for the NHS to meet the needs of older people. These actions are: (1) to improve the health of older people; (2) to improve the social care of older people; (3) to improve the housing of older people; and (4) to improve the transport of older people.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets. These initiatives have led to a number of changes in the way that public services are delivered, and have led to a number of improvements in the efficiency of the public sector.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

Another reason for the need to improve the efficiency of the public sector is the increasing demand for public services. This is due to a number of factors, including the increasing demand for health care, education, and social services.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts, or by allowing private companies to take over public services.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and can be used to reward public services that perform well.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that public services are not compromised, the need to ensure that public resources are not misused, and the need to ensure that public services are delivered in a timely and efficient manner.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is because the public sector is a major part of the economy, and it is essential that it be able to deliver public services in a timely and efficient manner.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are parents, with 1.5 million parents employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-parents, with 1.5 million non-parents employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are homeowners, with 1.5 million homeowners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-homeowners, with 1.5 million non-homeowners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are car owners, with 1.5 million car owners employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-car owners, with 1.5 million non-car owners employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are smokers, with 1.5 million smokers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-smokers, with 1.5 million non-smokers employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are drinkers, with 1.5 million drinkers employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are non-drinkers, with 1.5 million non-drinkers employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society.

The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently and actively; and (3) to ensure that older people are able to participate in society. The public sector has also become an important employer of people who are over 60 years of age, with 1.5 million people over 60 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 65 years of age, with 1.5 million people over 65 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 70 years of age, with 1.5 million people over 70 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 75 years of age, with 1.5 million people over 75 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 80 years of age, with 1.5 million people over 80 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 85 years of age, with 1.5 million people over 85 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 90 years of age, with 1.5 million people over 90 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 95 years of age, with 1.5 million people over 95 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 100 years of age, with 1.5 million people over 100 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 105 years of age, with 1.5 million people over 105 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 110 years of age, with 1.5 million people over 110 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 115 years of age, with 1.5 million people over 115 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are over 120 years of age, with 1.5 million people over 120 years of age employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). The number of people aged 65 and over who are living alone has increased from 1.1 million in 1990 to 1.5 million in 2000 (Office for National Statistics 2001). The number of people aged 65 and over who are living alone is projected to increase to 2.1 million by 2020 (Office for National Statistics 2001).

There is a growing awareness of the need to address the needs of older people who are living alone. The Department of Health (2000) has identified the need to develop a national strategy for older people who are living alone. The strategy should focus on the needs of older people who are living alone and on the needs of their families and carers. The strategy should also focus on the needs of older people who are living alone and on the needs of their families and carers.

The Department of Health (2000) has identified the need to develop a national strategy for older people who are living alone. The strategy should focus on the needs of older people who are living alone and on the needs of their families and carers. The strategy should also focus on the needs of older people who are living alone and on the needs of their families and carers.

The Department of Health (2000) has identified the need to develop a national strategy for older people who are living alone. The strategy should focus on the needs of older people who are living alone and on the needs of their families and carers. The strategy should also focus on the needs of older people who are living alone and on the needs of their families and carers.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law partnership, with 1.5 million people in a common-law partnership employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 6.5 million by 2020, and the number of people aged 75 and over to 4.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the health and social care needs of older people. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the health and social care of older people. The strategy is based on three main principles: (1) to improve the health and social care of older people; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.
