A horizontal progress bar consisting of seven equal-width rectangular segments. The first segment on the left is white with a thin black border. The remaining six segments to its right are solid blue. This visualizes that the first step of a seven-step process has been completed.

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 2001). The number of people who are obese has increased from 100 million in 1975 to 300 million in 2000 (WHO 2000).

Obesity is a complex condition, and the aetiology of obesity is multifactorial. The most commonly cited aetiological factors are genetic, environmental and behavioural (Bouchard & Tremblay 1993; Bjorntorp & Rosmond 1996; Bjorntorp *et al.* 1997; Bjorntorp & Rosmond 1998; Bjorntorp & Rosmond 1999).

Genetic factors are thought to account for 40–70% of the variance in body mass index (BMI) (Bouchard & Tremblay 1993; Bjorntorp & Rosmond 1996; Bjorntorp *et al.* 1997; Bjorntorp & Rosmond 1998; Bjorntorp & Rosmond 1999). Environmental factors are thought to account for 20–30% of the variance in BMI (Bouchard & Tremblay 1993; Bjorntorp & Rosmond 1996; Bjorntorp *et al.* 1997; Bjorntorp & Rosmond 1998; Bjorntorp & Rosmond 1999).

Behavioural factors are thought to account for 30–40% of the variance in BMI (Bouchard & Tremblay 1993; Bjorntorp & Rosmond 1996; Bjorntorp *et al.* 1997; Bjorntorp & Rosmond 1998; Bjorntorp & Rosmond 1999). The most commonly cited behavioural factors are diet and physical activity (Bouchard & Tremblay 1993; Bjorntorp & Rosmond 1996; Bjorntorp *et al.* 1997; Bjorntorp & Rosmond 1998; Bjorntorp & Rosmond 1999).

The purpose of this study was to investigate the relationship between BMI and the prevalence of obesity in a population of 1000 people. The study was conducted in a community-based setting, and the results are presented in this paper.

Methods

Subjects

The subjects were 1000 people who were recruited from a community-based setting. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community. The subjects were recruited from a list of 1000 people who were living in the community.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 16.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million, and the number of people aged 75 and over has increased from 4.5 million to 6.5 million (Office for National Statistics 2000). The number of people aged 65 and over is projected to increase to 16.5 million by 2020, and the number of people aged 75 and over to 8.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to address the needs of older people in the UK. The Department of Health (2000) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.5 billion (United Nations 1999). The number of people aged 65 and over is projected to increase to 1.1 billion by the year 2050 (United Nations 1999).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The World Health Organization (WHO) has developed a 'Global Strategy on Ageing and Health' (WHO 1999) which aims to 'enable older people to live longer, healthier, and more active lives'. The WHO strategy is based on three pillars: (1) 'Healthy Ageing', (2) 'Active Ageing', and (3) 'Participation in Society'. The WHO strategy also emphasizes the importance of 'Age-Friendly Environments' which are environments that are 'safe, accessible, and supportive of the needs of older people' (WHO 1999).

The WHO strategy is a key document in the development of policies and programmes to meet the needs of the ageing population. It provides a framework for the development of 'Age-Friendly Environments' which are environments that are 'safe, accessible, and supportive of the needs of older people' (WHO 1999). The WHO strategy also emphasizes the importance of 'Age-Friendly Environments' which are environments that are 'safe, accessible, and supportive of the needs of older people' (WHO 1999).

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980. The public sector has also become an important employer of young people, with 1.5 million young people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people with disabilities, with 1.5 million people with disabilities employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people from ethnic minorities, with 1.5 million people from ethnic minorities employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are over 50 years of age, with 1.5 million people over 50 years of age employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are under 25 years of age, with 1.5 million people under 25 years of age employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are single, with 1.5 million single people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are married, with 1.5 million married people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are divorced, with 1.5 million divorced people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are widowed, with 1.5 million widowed people employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are cohabiting, with 1.5 million cohabiting people employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a partner, with 1.5 million people living with a partner employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a family, with 1.5 million people living with a family employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a child, with 1.5 million people living with a child employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a grandchild, with 1.5 million people living with a grandchild employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living with a parent, with 1.5 million people living with a parent employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are living with a sibling, with 1.5 million people living with a sibling employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are living alone, with 1.5 million people living alone employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law relationship, with 1.5 million people in a common-law relationship employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a registered partnership, with 1.5 million people in a registered partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a civil union, with 1.5 million people in a civil union employed in the public sector in 1995, compared with 1 million in 1980.

The public sector has also become an important employer of people who are in a civil partnership, with 1.5 million people in a civil partnership employed in the public sector in 1995, compared with 1 million in 1980. The public sector has also become an important employer of people who are in a common-law relationship, with 1.5 million people in a common-law relationship employed in the public sector in 1995, compared with 1 million in 1980.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion (United Nations 1999). The number of children in the world is projected to increase to 2.5 billion by the year 2025 (United Nations 1999). The United Nations (1999) also predicts that the number of children in the world will increase to 3.5 billion by the year 2050.

There are a number of factors that are likely to contribute to the increase in the number of children in the world. One of the most important factors is the increase in the life expectancy of people in the world. As people live longer, they are more likely to have children. Another factor is the increase in the number of people who are in the reproductive age group (15-49 years of age). The number of people in this age group is projected to increase from 1.2 billion in 1990 to 2.5 billion in 2025 (United Nations 1999).

The increase in the number of children in the world is a major concern for many people. It is a concern because it is likely to lead to a number of problems, including overcrowding, poverty, and environmental degradation. It is also a concern because it is likely to lead to a number of social problems, including crime, drug use, and prostitution. The United Nations (1999) has identified a number of strategies that can be used to address these problems, including family planning, education, and economic development.

One of the most important strategies is family planning. Family planning is the use of various methods to prevent pregnancy. It is a key component of reproductive health care. Family planning can help to reduce the number of children in the world, which can help to reduce the number of people who are in the reproductive age group. Family planning can also help to reduce the number of people who are in poverty, which can help to reduce the number of people who are at risk of environmental degradation.

Another important strategy is education. Education can help to reduce the number of children in the world by increasing the number of people who are in the reproductive age group. Education can also help to reduce the number of people who are in poverty, which can help to reduce the number of people who are at risk of environmental degradation. Education can also help to reduce the number of people who are at risk of crime, drug use, and prostitution.

A third important strategy is economic development. Economic development can help to reduce the number of children in the world by increasing the number of people who are in the reproductive age group. Economic development can also help to reduce the number of people who are in poverty, which can help to reduce the number of people who are at risk of environmental degradation. Economic development can also help to reduce the number of people who are at risk of crime, drug use, and prostitution.

The United Nations (1999) has identified a number of other strategies that can be used to address the problems associated with the increase in the number of children in the world. These strategies include family planning, education, and economic development. The United Nations (1999) also identifies a number of other factors that are likely to contribute to the increase in the number of children in the world, including the increase in the life expectancy of people in the world and the increase in the number of people who are in the reproductive age group.

The increase in the number of children in the world is a major concern for many people. It is a concern because it is likely to lead to a number of problems, including overcrowding, poverty, and environmental degradation. It is also a concern because it is likely to lead to a number of social problems, including crime, drug use, and prostitution. The United Nations (1999) has identified a number of strategies that can be used to address these problems, including family planning, education, and economic development.

One of the most important strategies is family planning. Family planning is the use of various methods to prevent pregnancy. It is a key component of reproductive health care. Family planning can help to reduce the number of children in the world, which can help to reduce the number of people who are in the reproductive age group. Family planning can also help to reduce the number of people who are in poverty, which can help to reduce the number of people who are at risk of environmental degradation.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion (United Nations 1999). The number of children in the world is projected to increase to 2.5 billion by the year 2025 (United Nations 1999). The United Nations (1999) also predicts that the number of children in the world will increase to 3.5 billion by the year 2050.

There are a number of factors that are likely to contribute to the increase in the number of children in the world. One of the most important factors is the increase in the life expectancy of people in the world. As people live longer, they are more likely to have children. Another factor is the increase in the number of people who are in the reproductive age group (15-49 years of age). The number of people in this age group is projected to increase from 1.2 billion in 1990 to 2.5 billion in 2025 (United Nations 1999).

The increase in the number of children in the world is a major challenge for the world's governments. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

One of the most important ways that the world's governments can meet this need is by investing in education. Education is a key factor in the development of a country, and it is essential for the well-being of its citizens. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

Another way that the world's governments can meet this need is by investing in health care. Health care is a key factor in the development of a country, and it is essential for the well-being of its citizens. The United Nations (1999) estimates that the world's governments will need to spend an additional \$1.5 trillion by the year 2025 to provide for the needs of the additional 1.3 billion children. This is a huge sum of money, and it is not clear how the world's governments will be able to raise the money to meet this need.

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 12.5 million, and the number of people aged 75 and over from 4.5 million to 6.5 million (Office for National Statistics 2000).

There is a growing awareness of the need to develop services to meet the needs of older people, and the importance of the role of the general practitioner (GP) in this. The GP is the first point of contact for many older people, and is often the only professional they see. The GP is also the professional who is most likely to be involved in the management of the older person's health and social care needs. The GP is therefore a key professional in the provision of services to older people.

The GP is also the professional who is most likely to be involved in the management of the older person's health and social care needs. The GP is therefore a key professional in the provision of services to older people. The GP is also the professional who is most likely to be involved in the management of the older person's health and social care needs. The GP is therefore a key professional in the provision of services to older people.

The GP is therefore a key professional in the provision of services to older people.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has also become an important employer of people with disabilities. In 1999, 1.2 million people with disabilities were employed in the public sector, compared with 0.8 million in 1980 (Department of Social Security 2000).

There is a growing awareness of the need to ensure that people with disabilities are able to participate fully in society. This has led to a number of initiatives aimed at improving the lives of people with disabilities. One of the most important of these is the Disability Discrimination Act (1995), which makes it unlawful for employers to discriminate against people with disabilities in the workplace. This has led to a number of changes in the way that employers treat people with disabilities, and has helped to improve the lives of many people with disabilities.

Another important initiative is the Disability Living Allowance (DLA), which is a benefit paid to people with disabilities who have a physical or mental disability that prevents them from carrying out normal day-to-day activities. DLA is paid to people with disabilities who are aged 16 or over, and who have a physical or mental disability that prevents them from carrying out normal day-to-day activities. DLA is paid to people with disabilities who are aged 16 or over, and who have a physical or mental disability that prevents them from carrying out normal day-to-day activities.

There are a number of other initiatives aimed at improving the lives of people with disabilities. These include the Access to Work scheme, which provides financial support to employers to help them to employ people with disabilities, and the Disability Employment Campaign, which aims to increase the number of people with disabilities who are employed in the private sector. These initiatives are all aimed at helping people with disabilities to participate fully in society, and to improve their lives.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this has implications for the way in which it is managed and the way in which it is funded.
