the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the public sector has increased by 2.5 million (1990–1999).

There is a growing emphasis on the need to improve the efficiency of the public sector. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public resources. This is due to a number of factors, including the increasing cost of public services, the increasing demand for public services, and the increasing pressure on public resources.

There are a number of ways in which the efficiency of the public sector can be improved. These include the introduction of competition, the restructuring of public services, and the introduction of performance targets.

One of the main ways in which the efficiency of the public sector can be improved is by the introduction of competition. This can be done by allowing private companies to compete for public contracts.

Another way in which the efficiency of the public sector can be improved is by the restructuring of public services. This can be done by merging public services, or by transferring public services to private companies.

A third way in which the efficiency of the public sector can be improved is by the introduction of performance targets. These targets can be used to measure the performance of public services, and to identify areas for improvement.

There are a number of challenges associated with improving the efficiency of the public sector. These include the need to ensure that the quality of public services is maintained, and the need to ensure that the interests of the public are protected.

Despite these challenges, there is a growing consensus that the efficiency of the public sector must be improved. This is in order to ensure that public resources are used effectively, and that the quality of public services is maintained.
