the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995 (Department of Health 1996).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public in a cost-effective manner.

One of the main reasons for the need to improve the efficiency of the public sector is the increasing pressure on public sector budgets. The public sector is now facing a significant budget deficit, and it is essential that the public sector is able to reduce its costs in order to meet its financial obligations.

One of the main ways in which the public sector can reduce its costs is by improving the efficiency of its operations. This can be achieved by a number of measures, including the following:

- Reducing the number of staff employed in the public sector.
- Improving the productivity of staff.
- Reducing the cost of the services provided by the public sector.

One of the main challenges facing the public sector is the need to improve the efficiency of its operations while at the same time maintaining the quality of the services that it provides. This is a difficult task, and it is essential that the public sector is able to find ways in which to improve its efficiency without compromising the quality of its services.

One of the main ways in which the public sector can improve the efficiency of its operations is by using information technology. Information technology can be used in a number of ways to improve the efficiency of the public sector, including the following:

- Improving the way in which the public sector collects and processes data.
- Improving the way in which the public sector communicates with the public.
- Improving the way in which the public sector manages its resources.

One of the main challenges facing the public sector is the need to improve the efficiency of its operations while at the same time maintaining the quality of the services that it provides.
