the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own aims and objectives. The public sector is also funded by the government, and this means that it is subject to government control and regulation.

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the services that are required by the public. This has led to a number of initiatives, including the introduction of competition, the restructuring of public sector organisations, and the introduction of new management practices. The aim of these initiatives is to ensure that the public sector is able to deliver the services that are required by the public, in a cost-effective and efficient manner.

The aim of this paper is to review the literature on the impact of the public sector on the health of the population. The paper will focus on the impact of the public sector on the health of the population in the UK, and will consider the impact of the public sector on the health of the population in the context of the current initiatives to improve the efficiency of the public sector.

The paper will first consider the impact of the public sector on the health of the population in the UK, and will then consider the impact of the public sector on the health of the population in the context of the current initiatives to improve the efficiency of the public sector.
