the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming more undernourished. First, the world's population is growing rapidly, and the number of mouths to feed is increasing. Second, the world's food production is not keeping pace with the growing demand. Third, the world's food distribution is becoming more unequal, with the rich countries consuming more food than the poor countries.

There are a number of ways in which the world's food production can be increased. First, more land can be brought into production. Second, more food can be produced on the same amount of land by using more fertilizers and pesticides. Third, more food can be produced on the same amount of land by using more efficient farming techniques.

There are a number of ways in which the world's food distribution can be made more equal. First, the rich countries can donate more food to the poor countries. Second, the rich countries can provide more financial aid to the poor countries to help them develop their own food production. Third, the rich countries can provide more technical assistance to the poor countries to help them improve their farming techniques.

There are a number of ways in which the world's food production can be made more sustainable. First, more land can be brought into production in a sustainable way. Second, more food can be produced on the same amount of land in a sustainable way by using more sustainable farming techniques. Third, more food can be produced on the same amount of land in a sustainable way by using more sustainable farming techniques.

There are a number of ways in which the world's food production can be made more secure. First, more land can be brought into production in a secure way. Second, more food can be produced on the same amount of land in a secure way by using more secure farming techniques. Third, more food can be produced on the same amount of land in a secure way by using more secure farming techniques.

There are a number of ways in which the world's food production can be made more affordable. First, more land can be brought into production in an affordable way. Second, more food can be produced on the same amount of land in an affordable way by using more affordable farming techniques. Third, more food can be produced on the same amount of land in an affordable way by using more affordable farming techniques.

There are a number of ways in which the world's food production can be made more available. First, more land can be brought into production in an available way. Second, more food can be produced on the same amount of land in an available way by using more available farming techniques. Third, more food can be produced on the same amount of land in an available way by using more available farming techniques.

There are a number of ways in which the world's food production can be made more accessible. First, more land can be brought into production in an accessible way. Second, more food can be produced on the same amount of land in an accessible way by using more accessible farming techniques. Third, more food can be produced on the same amount of land in an accessible way by using more accessible farming techniques.

There are a number of ways in which the world's food production can be made more acceptable. First, more land can be brought into production in an acceptable way. Second, more food can be produced on the same amount of land in an acceptable way by using more acceptable farming techniques. Third, more food can be produced on the same amount of land in an acceptable way by using more acceptable farming techniques.

There are a number of ways in which the world's food production can be made more attractive. First, more land can be brought into production in an attractive way. Second, more food can be produced on the same amount of land in an attractive way by using more attractive farming techniques. Third, more food can be produced on the same amount of land in an attractive way by using more attractive farming techniques.

There are a number of ways in which the world's food production can be made more desirable. First, more land can be brought into production in a desirable way. Second, more food can be produced on the same amount of land in a desirable way by using more desirable farming techniques. Third, more food can be produced on the same amount of land in a desirable way by using more desirable farming techniques.

There are a number of ways in which the world's food production can be made more desirable. First, more land can be brought into production in a desirable way. Second, more food can be produced on the same amount of land in a desirable way by using more desirable farming techniques. Third, more food can be produced on the same amount of land in a desirable way by using more desirable farming techniques.
