the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1995). The public sector has become a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is a complex organisation, and it is difficult to understand how it works. The public sector is made up of many different organisations, each of which has its own objectives and its own way of working. The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

The public sector is also a major employer in the UK, and this has implications for the way in which the public sector is managed and the way in which it is funded.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and is projected to increase by a further 1.5 million by 2010 (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives aimed at improving the efficiency of the public sector, including the introduction of competition, the restructuring of public sector organisations, and the introduction of performance targets. The aim of this paper is to review the evidence on the effectiveness of these initiatives and to discuss the implications for the future of the public sector.

The paper is organised as follows. Section 2 discusses the evidence on the effectiveness of competition. Section 3 discusses the evidence on the effectiveness of restructuring. Section 4 discusses the evidence on the effectiveness of performance targets. Section 5 discusses the implications for the future of the public sector.

2. Evidence on the effectiveness of competition
